

RAD Studio Spring 2017

(Spring in Brazil, Fall in USA)

Product Address

Jim McKeeth, Embarcadero Technologies

jim.mckeeth@embarcadero.com

@JimMcKeeth

About Jim McKeeth

Chief Developer Advocate & Engineer

Long time software developer

Invented and patented pattern and swipe to unlock

US Patent # 8352745 & 6766456, etc.

Built thought controlled drone with Google Glass

Host of Podcast at Delphi.org

Lives near Boise, Idaho, USA with family & dogs

Improvisational comedy performer w/ CSz Boise

Contributor to *Internet of Things and Data Analytics Handbook*

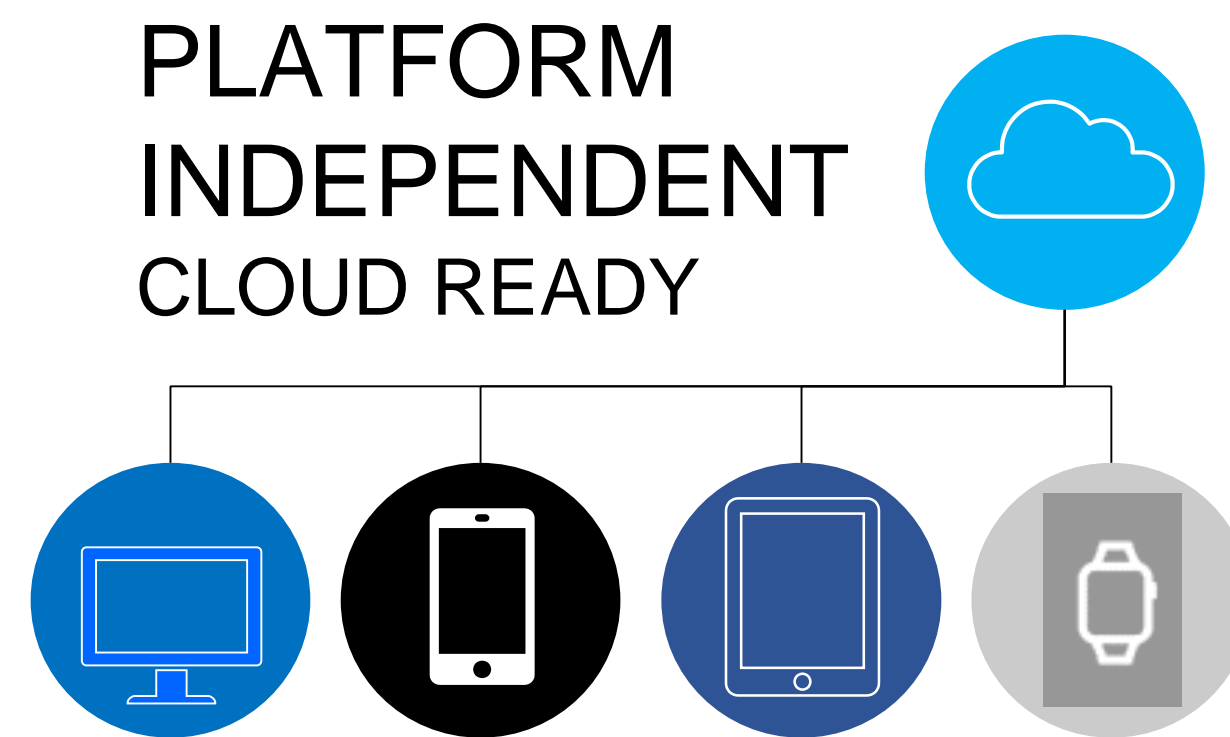

Embarcadero for Developers

- Development Tools
 - RAD Studio, Delphi, C++Builder
 - *ExtJS, ExtReact, Sencha Architect*
- Database Engines
 - InterBase
- Testing
 - *Sencha Test*
 - *Ranorex Test Automation*

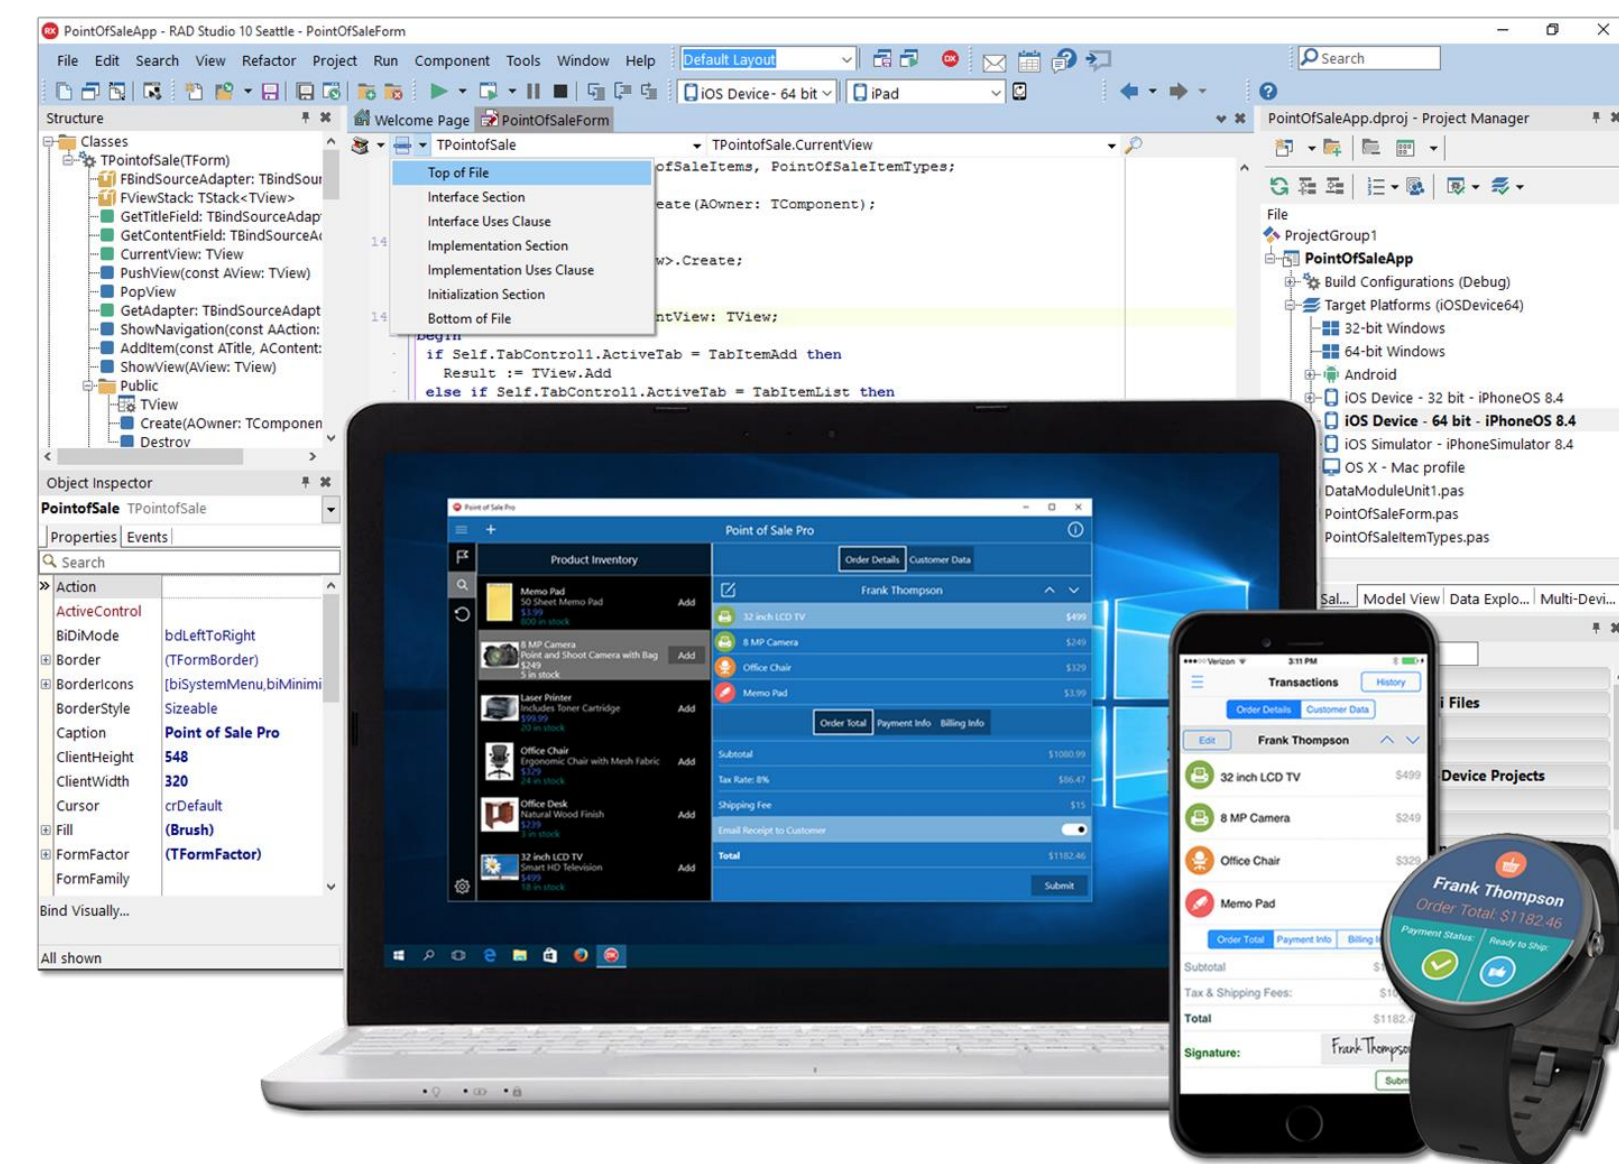

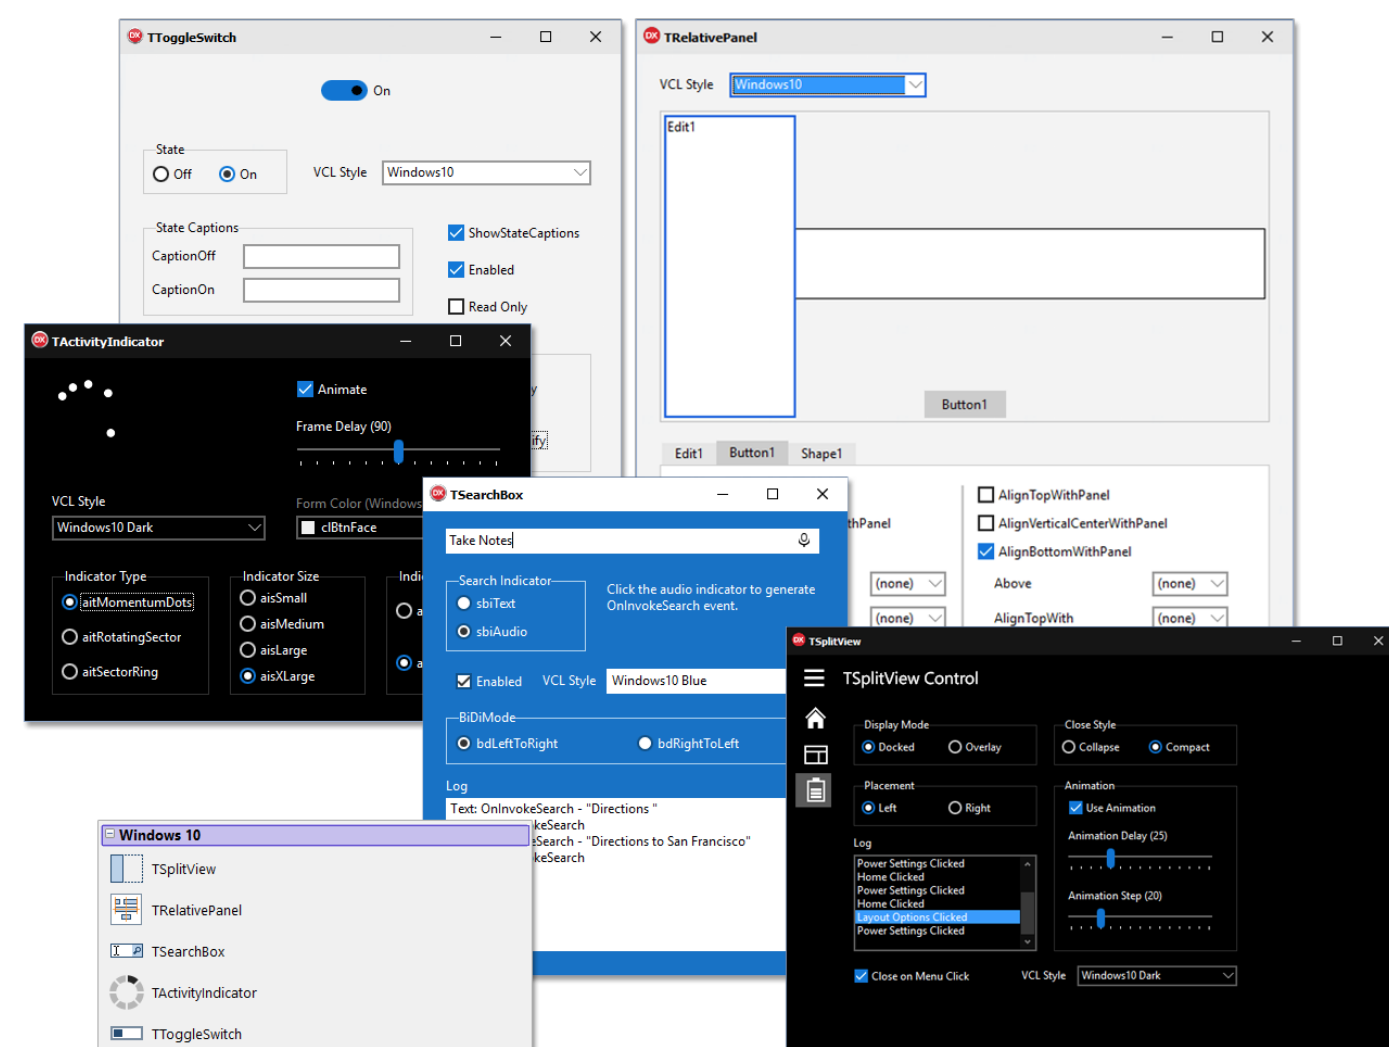

What is RAD Studio?

The fastest way to develop cross-platform native apps with flexible cloud services and broad IoT connectivity

Fast, Visual Development

RAD Studio provides powerful VCL controls for Windows 10 and enables FMX cross-platform development for Windows, Mac, iOS and Android

RAD Studio Platform Support

Target the latest versions of major operating systems with one codebase!

macOS Sierra

Linux 64-bit (Ubuntu and Red Hat Enterprise)
Delphi Only

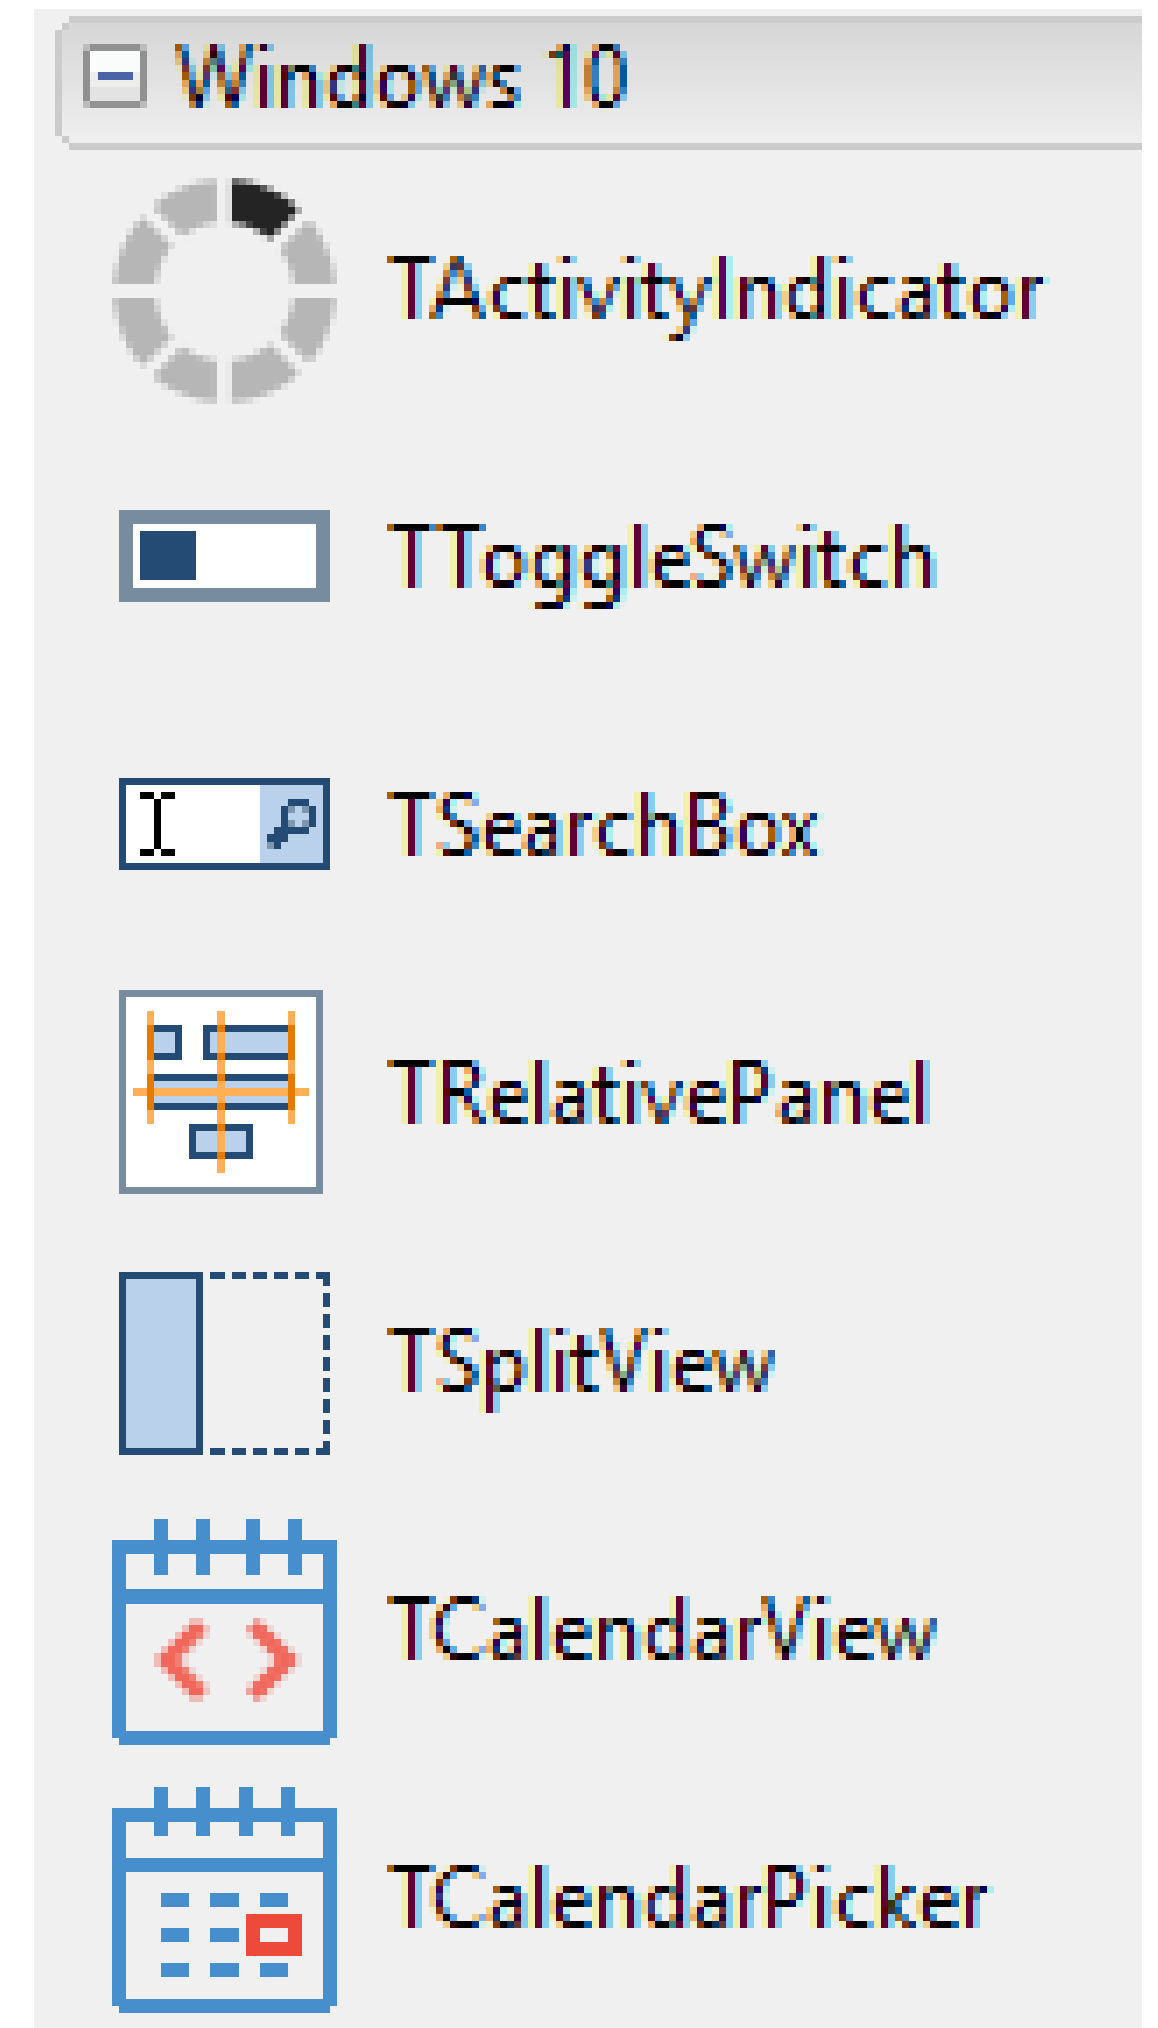

Android N and O

Officially Supporting

VCL: The Best Solution for Windows 10

- The best UI controls library for Windows
- Includes direct access to Win32 APIs, COM Shell Controls, WinRT new APIs
- VCL controls corresponding common Windows 10 UI elements (but not limited to Windows 10)
- Style your existing VCL apps
- Publish VCL apps on Windows Store via Desktop Bridge

Cross-platform, native apps

Write your UI once, customize at design time, deploy everywhere!

- Native platform compilers for maximum performance and security
 - 5 operating systems,
 - CPUs: 32bit and 64bit CPUs, Intel and ARM
- Cross platform runtime library and database access
- FireMonkey visual component library
 - Flexible designers, styling, platform components

FireDAC: High-performance Data

FireDAC

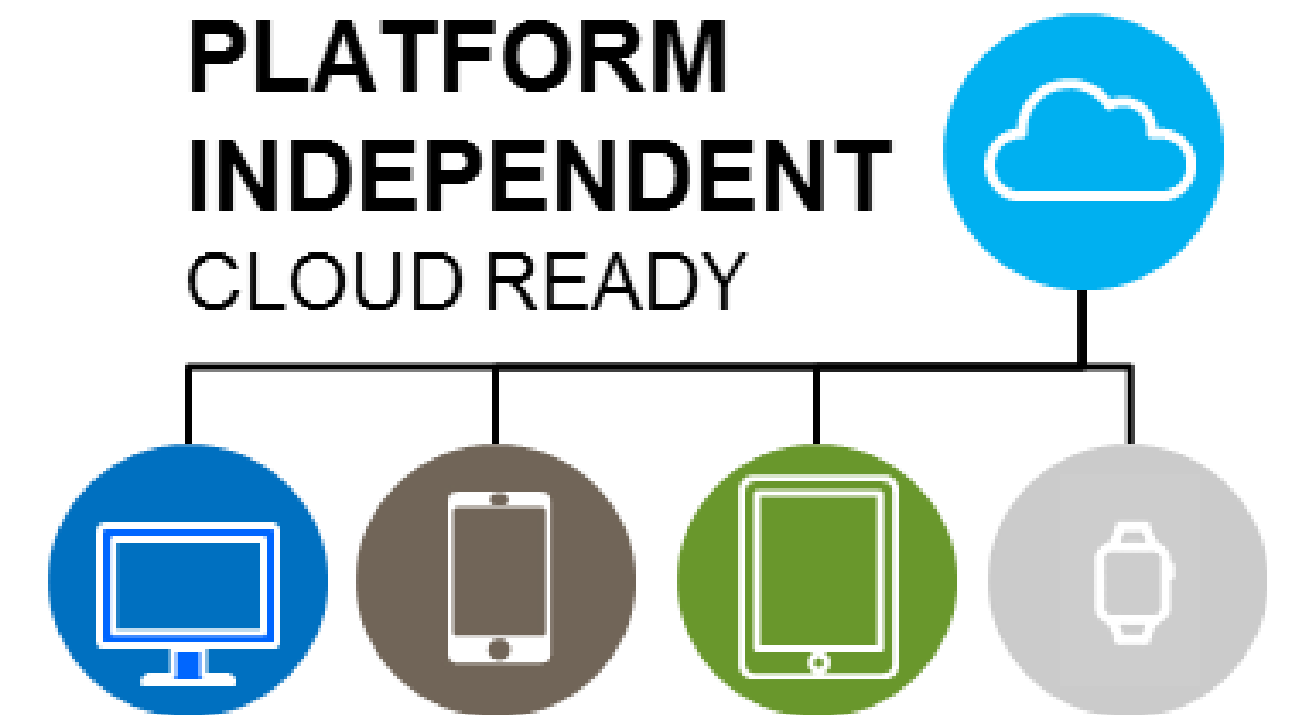

High-performance, easy-to-use, enterprise database connectivity, in-memory data caching and processing

Universal data access, with database specific features: No drivers required and full source code provided

Works on all server and client platforms, mobile included

Cloud Services

- AWS and Azure support
 - Access to storage, tables, queuing
- Backend-as-a-Service (BaaS) providers
 - Including Parse API (now hosted by other vendors), Kinvey
- REST and HTTP client libraries for direct access
 - Based on platform libraries, native HTTPS support
- FireDAC NoSQL database access
 - Full support for MongoDB, on premise or in cloud

Internet of Things Capabilities

Extend your desktop and mobile apps to IoT

- Connectivity
 - Bluetooth, Bluetooth LE, REST, and WiFi
- Control
 - Ready-to-use IoT components
 - Proximity awareness, BeaconFence
- Actionable Data
 - Sensors data collection
- Device Management
 - Distributed device monitoring with ThingPoints

C++Builder

- C++11 language support for Windows and Mobile
- CLANG-enhanced compilers, with RAD model support
- C++11: “Almost feels like a new language”
 - Lambdas
 - Move semantics
 - Automatic type deduction
 - Native concurrency
 - Better Smart Pointers
 - Range-for

Delphi

- Based on Modern Object Pascal programming language
- High-performance native compilers for all platforms
- Best easy-to-use, complete, OOP, RAD language
- Leverage a large community of Delphi developers
 - In all industries and at all latitudes
- *(New)* Large-Memory enabled Delphi stand-alone compilers

InterBase 2017: Embed, Deploy, Relax!

Self-tuning, High Performance SQL-92 Relational Database Management System

InterBase Server:

- Windows
- Linux

IBToGo:

- Windows
- MacOS
- iOS
- Android
- Linux

IOTA

INTERNET OF THINGS AWARDS

— WINNER —

Most Innovative
Use of Data

New hot features:

- Changed Views
 - Derived tables
 - Server-wide performance monitoring
 - Common table expressions
- ... and more

New: Enterprise Connectors

Connecting to Any Application is as Easy as Connecting to a Database

- RAD Studio Add-On
 - Extend Delphi & C++ Builder Apps with SaaS, NoSQL, & Big Data Connectivity.
- 80+ Sources and Growing
 - 45 Connectors in Enterprise
 - 80 Connectors in Enterprise Plus
- Direct Real Time Access
- Royalty Free Distribution
 - Per-developer Royalty Free Distribution Rights
 - Build Rights with valid current subscription

Annual Developer Subscription: ongoing updates, upgrades and releases

Hosting JSON/REST APIs with RAD

Server

System Database

Pluggable EMS
packages (*.bpl)

- Push
- Edgemodules

- Resource A1
- Resource A2

- Resource B1

- ...

HTTP Clients

Natively compiled FMX
clients or HTML +
JavaScript clients

What's New in 10.2 and 10.2.1

Summary of What's New in 10.2

- New Delphi Linux 64-bit platform support
- IDE improvements
- New FireDAC drivers and DB RTL changes
- RAD Server Multi-Tenancy support
- Unified Android threading model
- C++ compilers improvements

And much more...

Delphi Support for Linux Servers

- Linux 64-bit Servers
- Expected to work on most distributions
- Server-side technologies
 - RTL, DB RTL, IOUtils and file system access, FireDAC, HTTP, REST, Cloud, WebBroker, Apache integration, DataSnap, EMS/RAD Server, JSON, XML, SOAP, Indy, IoT, and more

Officially Supports:	
	
Red Hat Enterprise 7	Ubuntu 16.x LTS

What's New in 10.2.1

- Improved QPS (Quality, Performance, Stability)
 - Fixed over 140 customer reported Quality Portal issues
- BPL package loading for Windows Creators Update
- Improved support for latest versions of iOS and XCode
- TEdit improvements on latest Android, faster controls rendering
- Parse API for other providers
- FireDAC improvements for SQL Server, InterBase 2017, ODBC
- Linker improvements for large C++ projects

What's Coming in 10.2.2*

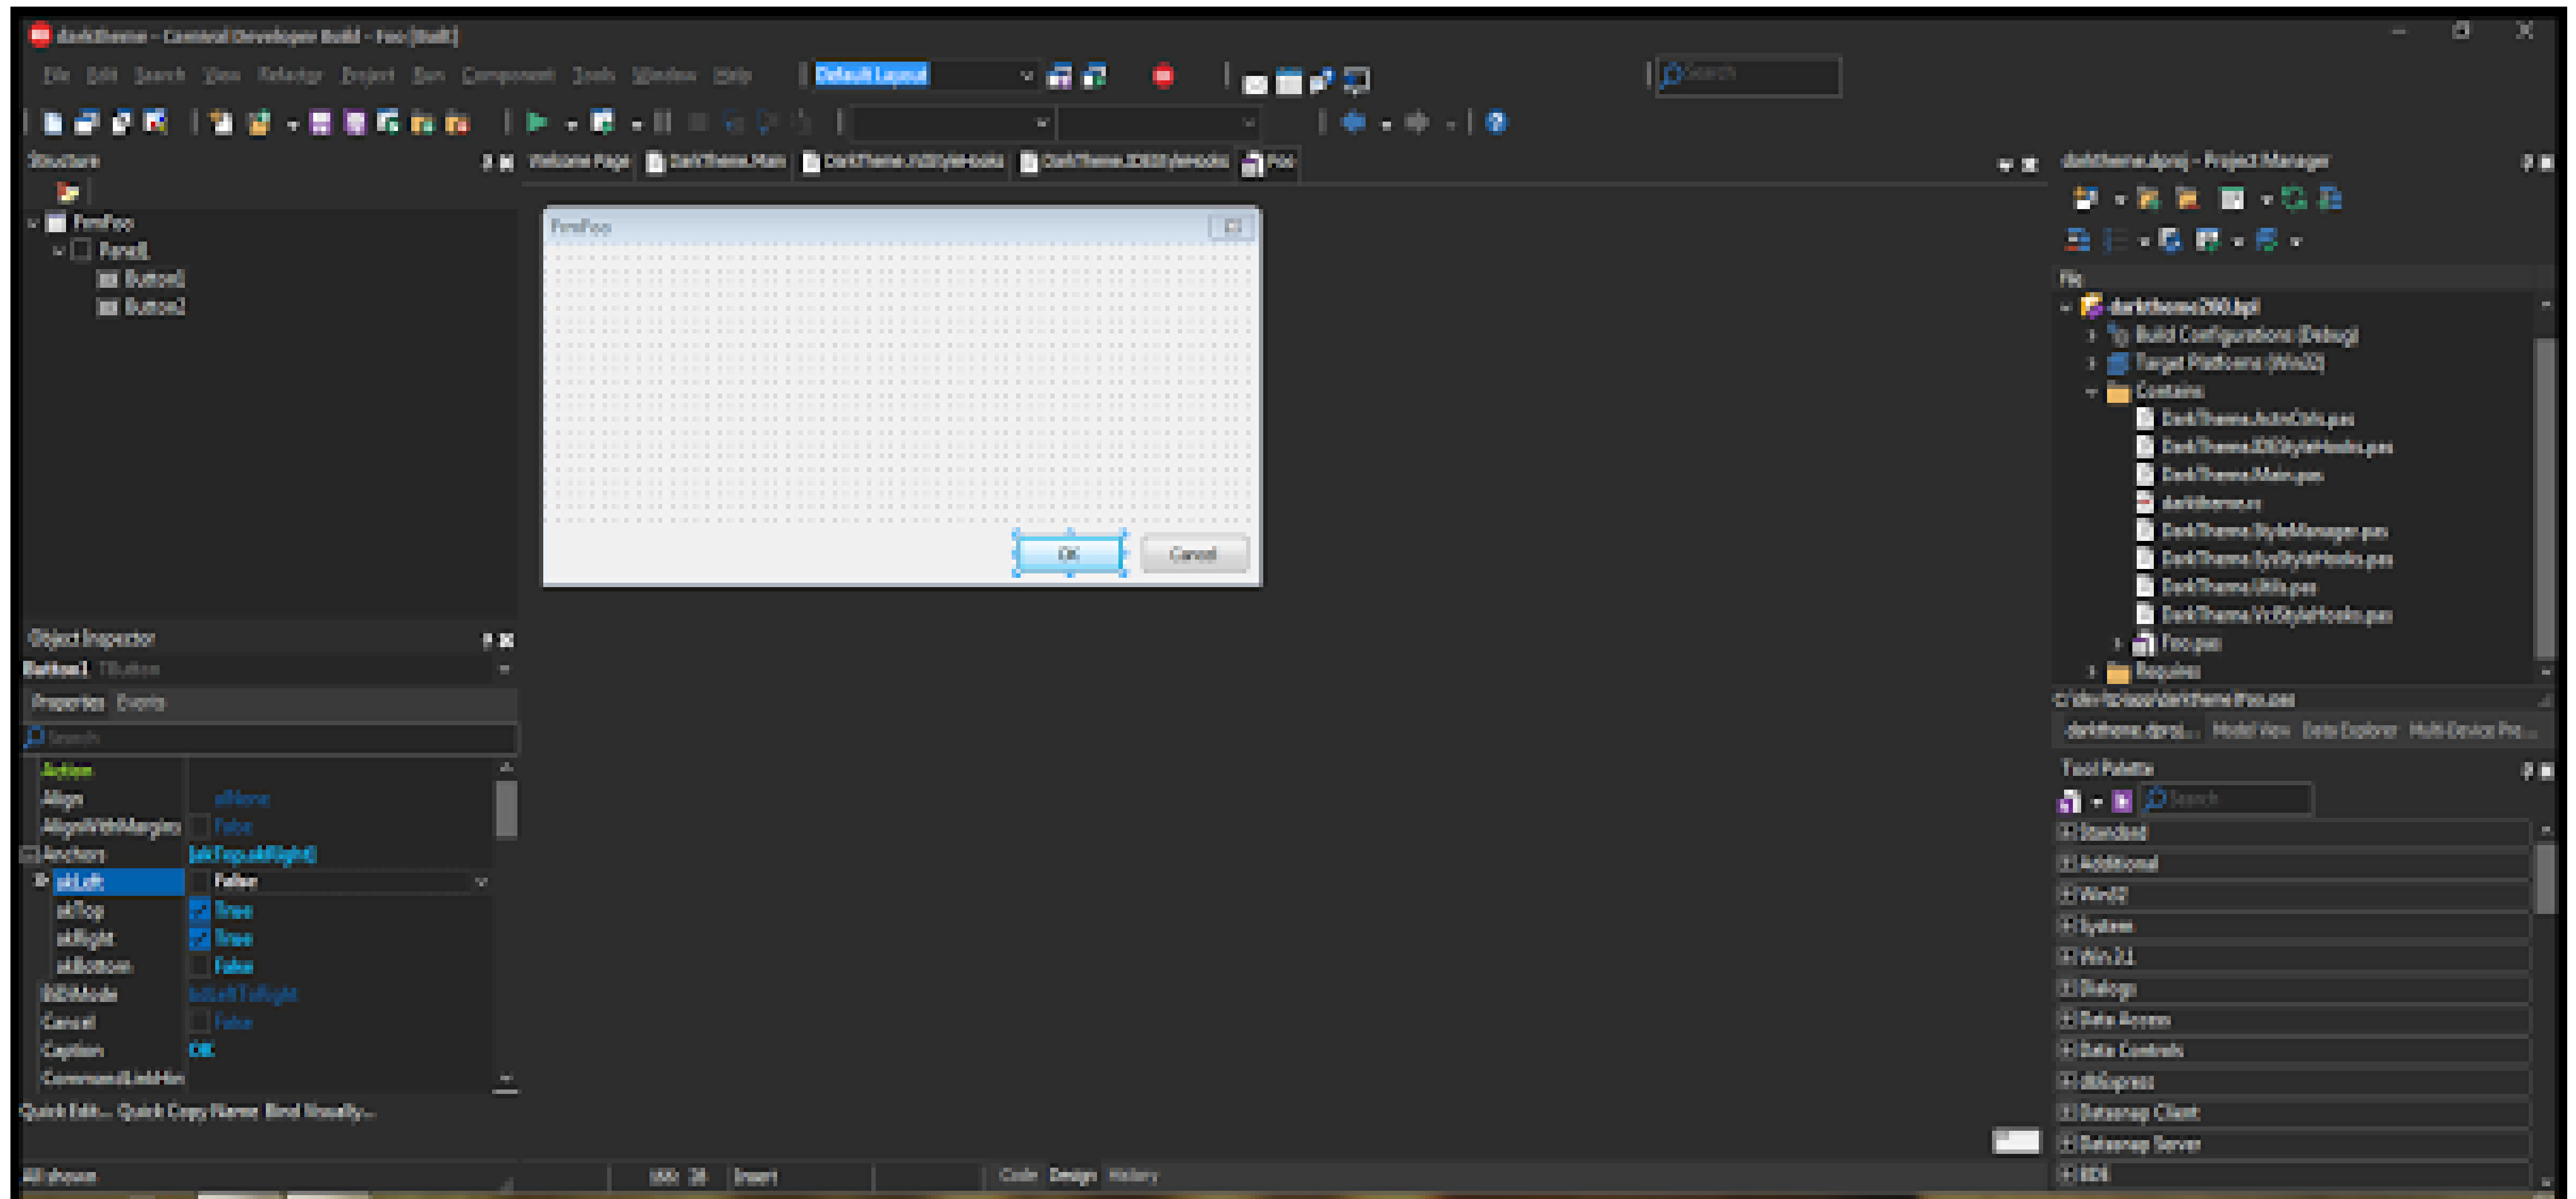

- QPS: Quality, Performance and Stability
- Dark IDE Theme
- New VCL Controls

* Features are not committed until GA of product

IDE Productivity

Dark Theme Preview

Improved IDE menus

Fast navigation with improved IDE menus

Quick Edits

Recent Productivity Enhancements

- Structure View parser for C++
 - Based on the C++ 11 language specification
 - IDE shows header dependencies for CLANG-based 32bit C++ compiler
- Bookmarks stack
- Selection “syntactic” expansion (Ctrl+W)
- File associations in the Options dialog
- Delphi Methods Toxicity metrics

Method Name	Length	Parameters	If Depth	Cyclomatic Complexity	Toxicity
TForm18.Button1Click	24	1	0	6	1.050
TForm18.Log	1	1	0	1	0.096
TForm18.FormCreate	0	1	0	1	0.083

BUILDING WINDOWS 10 APPLICATIONS

Why Windows 10?

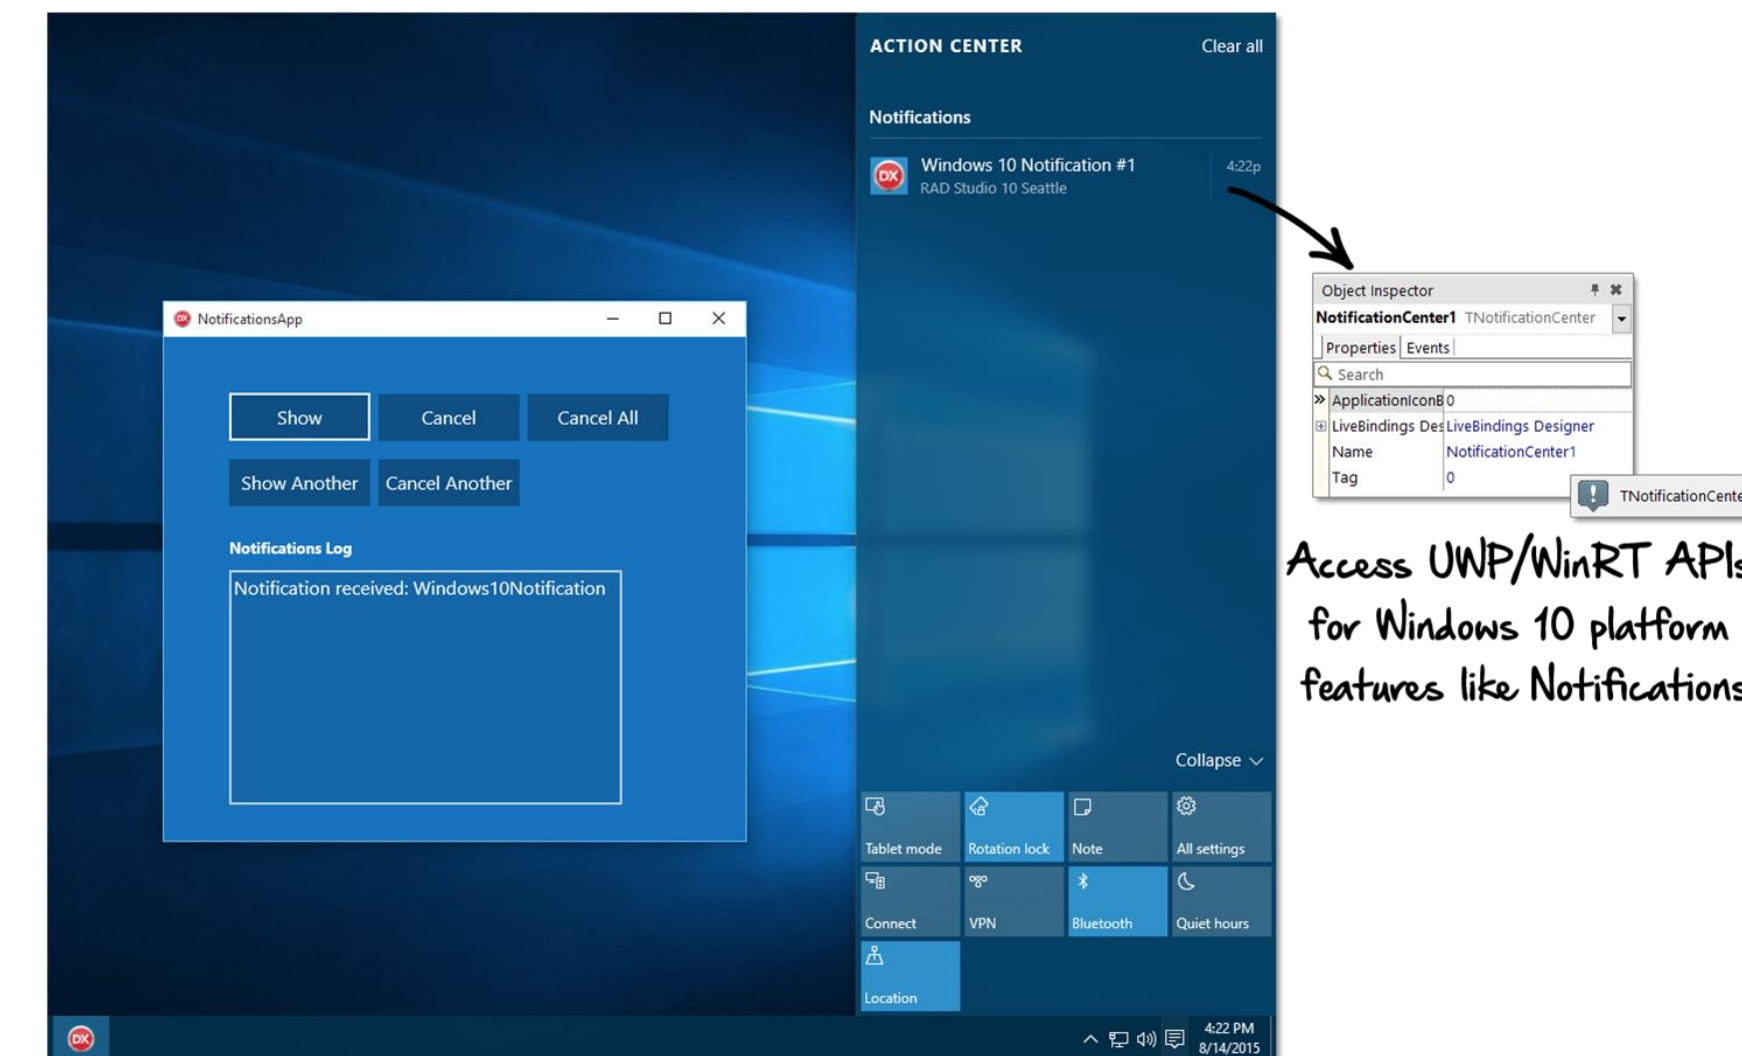

- 500 Million Installed Base
 - ~28% Market share and growing
 - Enterprise Adoption Gains expected with Win7 EOL in Jan 2020
- VCL offers the best migration path to Windows 10
 - Retains support for older versions of Windows
 - Deploy to Windows 10 store via project Centennial

VCL and Windows are and will remain a key focus of RAD Studio

RAD Studio Windows 10 Support

- Unparalleled support for Windows platform
 - The VCL is the best and most complete component library for native Windows
 - Integrating Win32, Win64 and also WinRT APIs
- Windows 10 Specific Components
 - Windows 10 UI controls
 - Windows 10 notifications and contracts components
 - Available since RAD Studio 10 Seattle

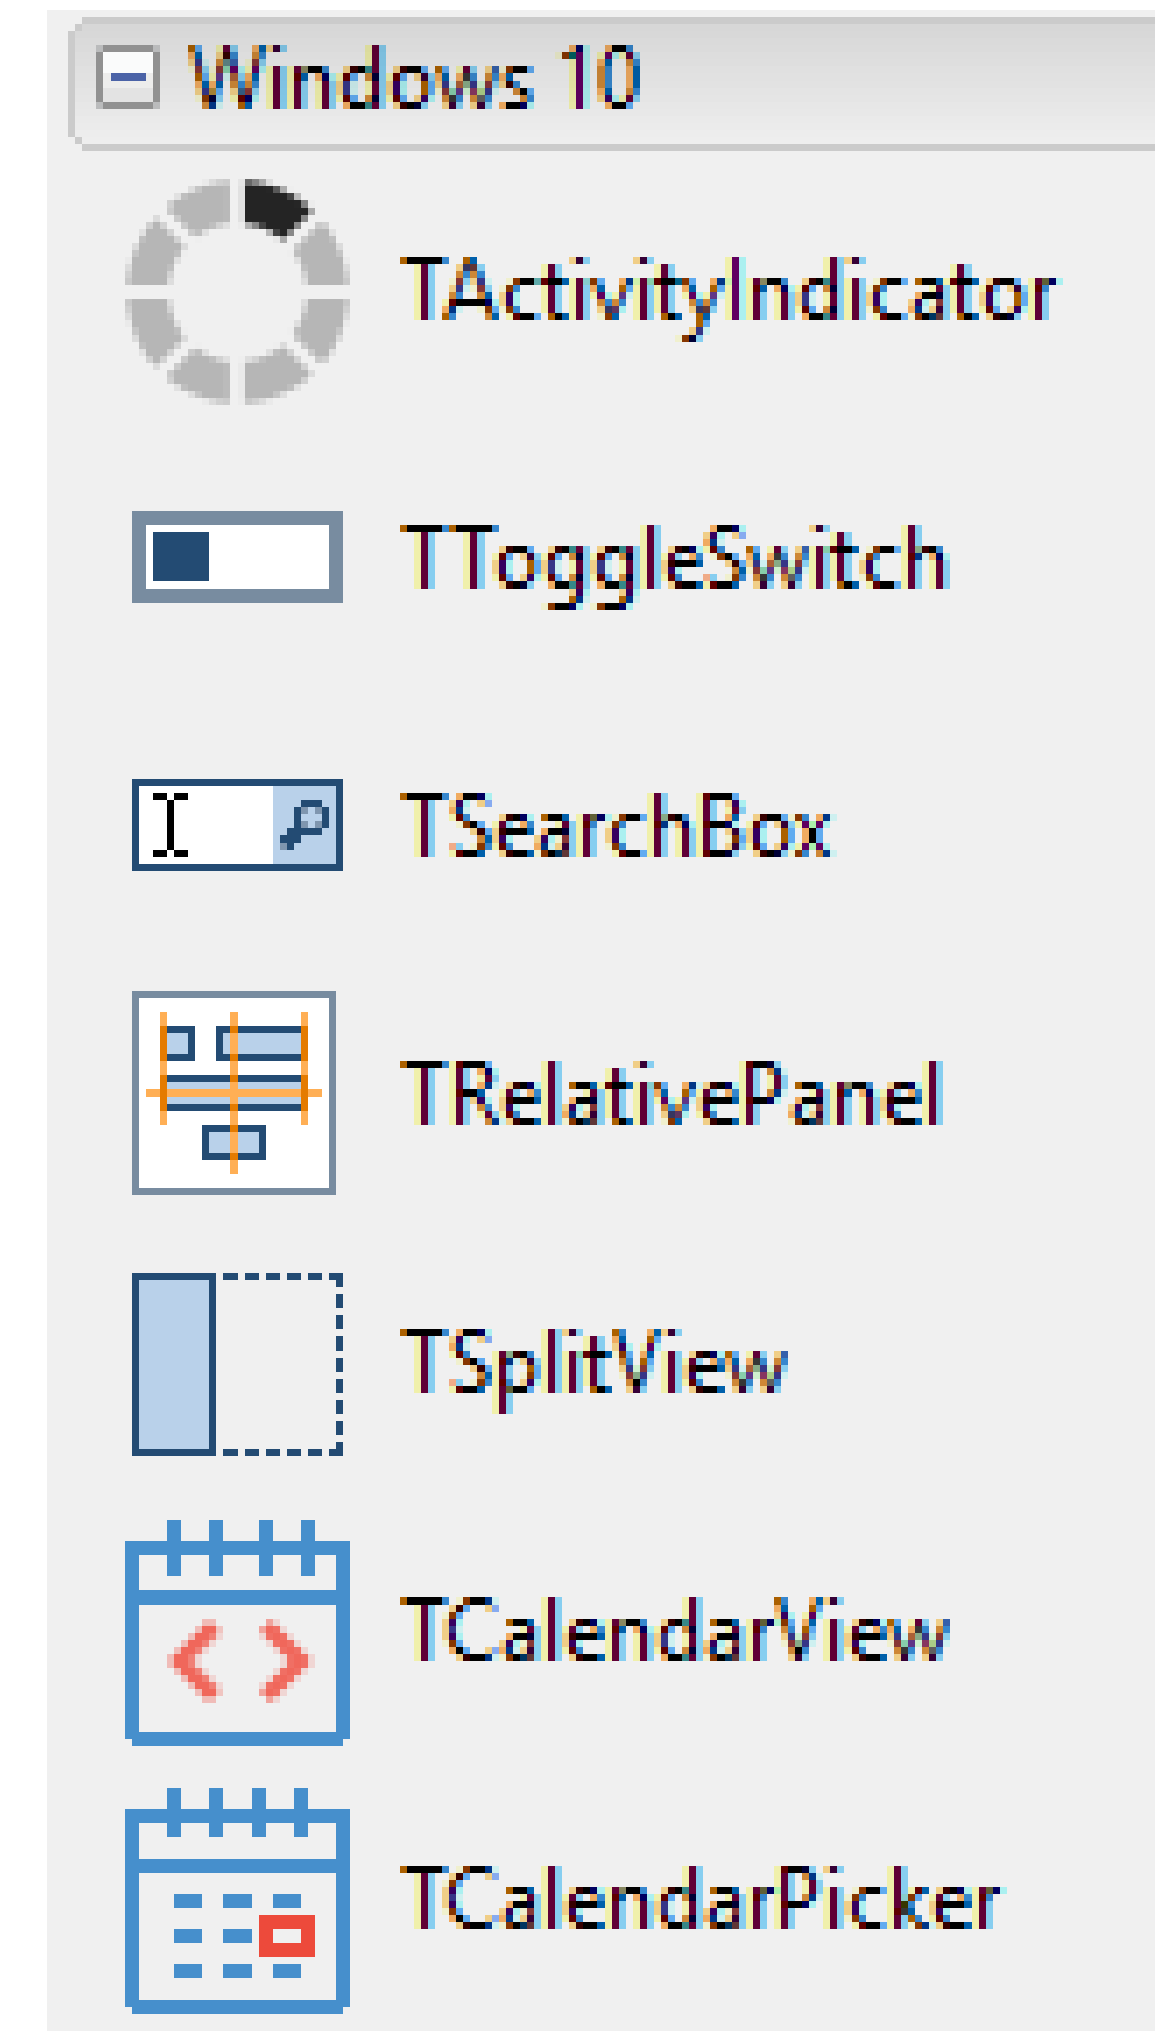

Windows 10 VCL Controls

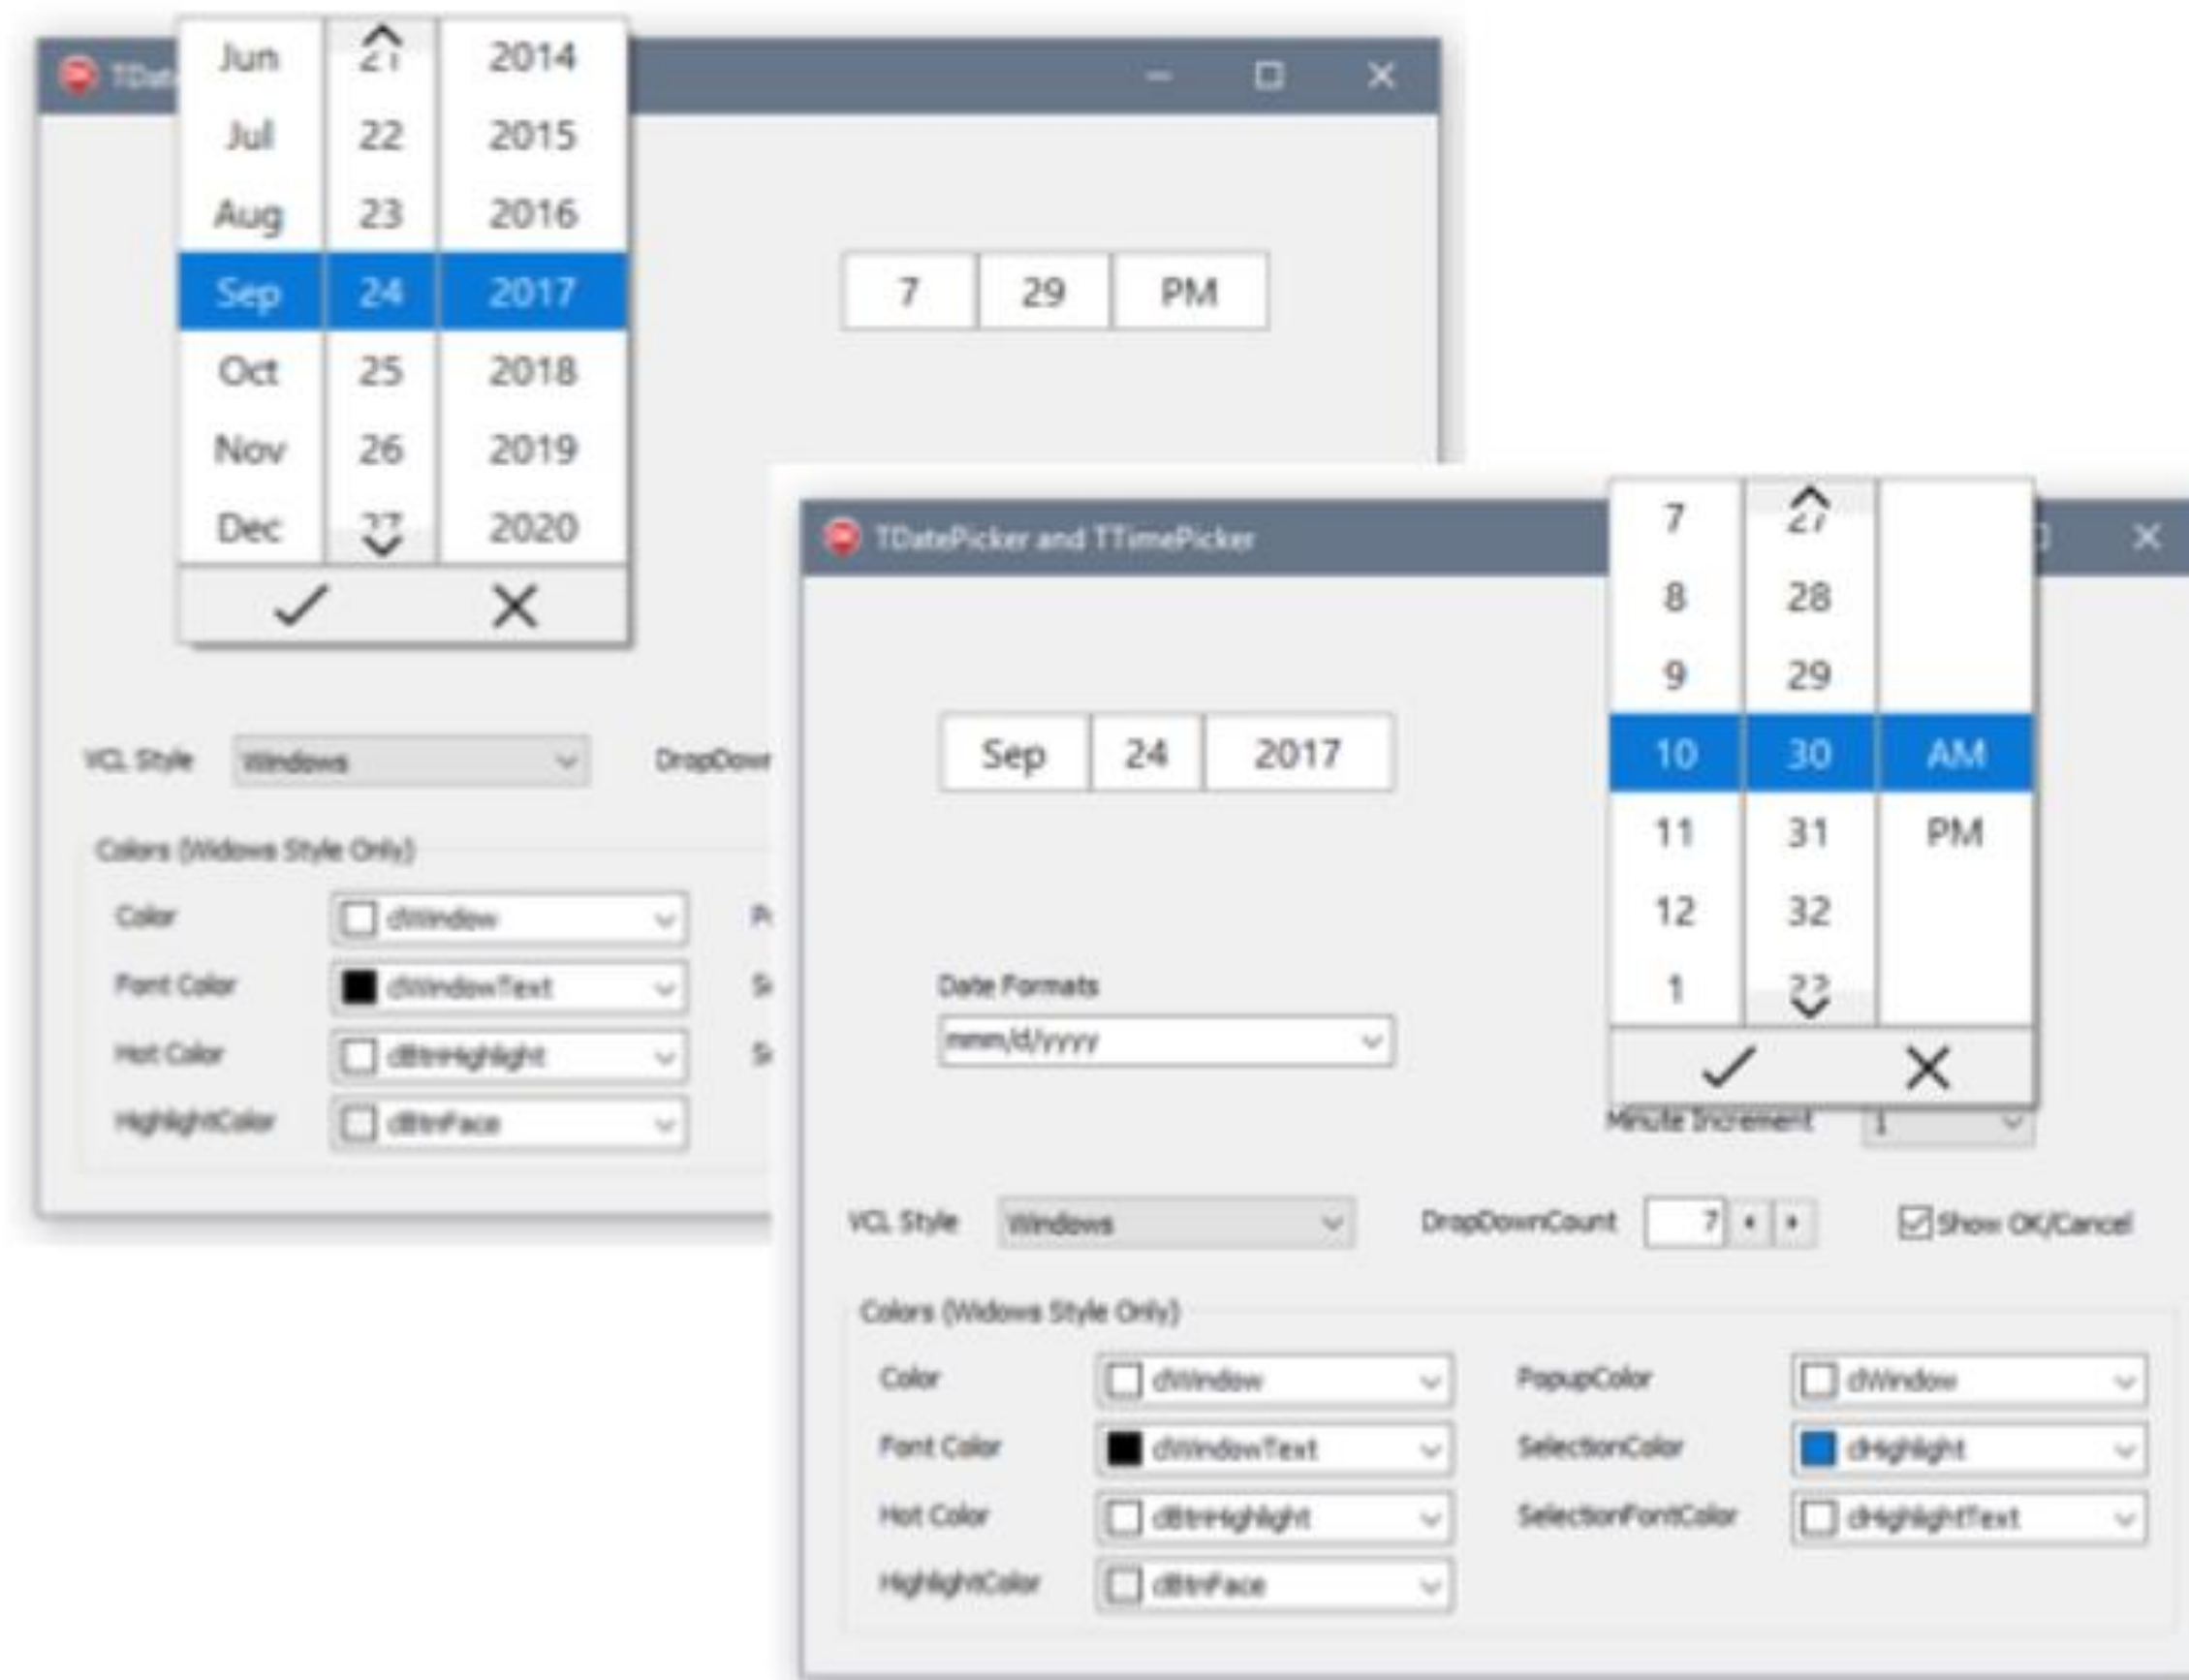

Native VCL controls mapping
common Windows 10 UI elements

Not tied to WinRT API, will work also
on Windows 7 and 8

***More VCL Windows 10 UX native
controls are coming!***

New VCL Controls Coming

Windows 10 VCL Styles

Windows 10

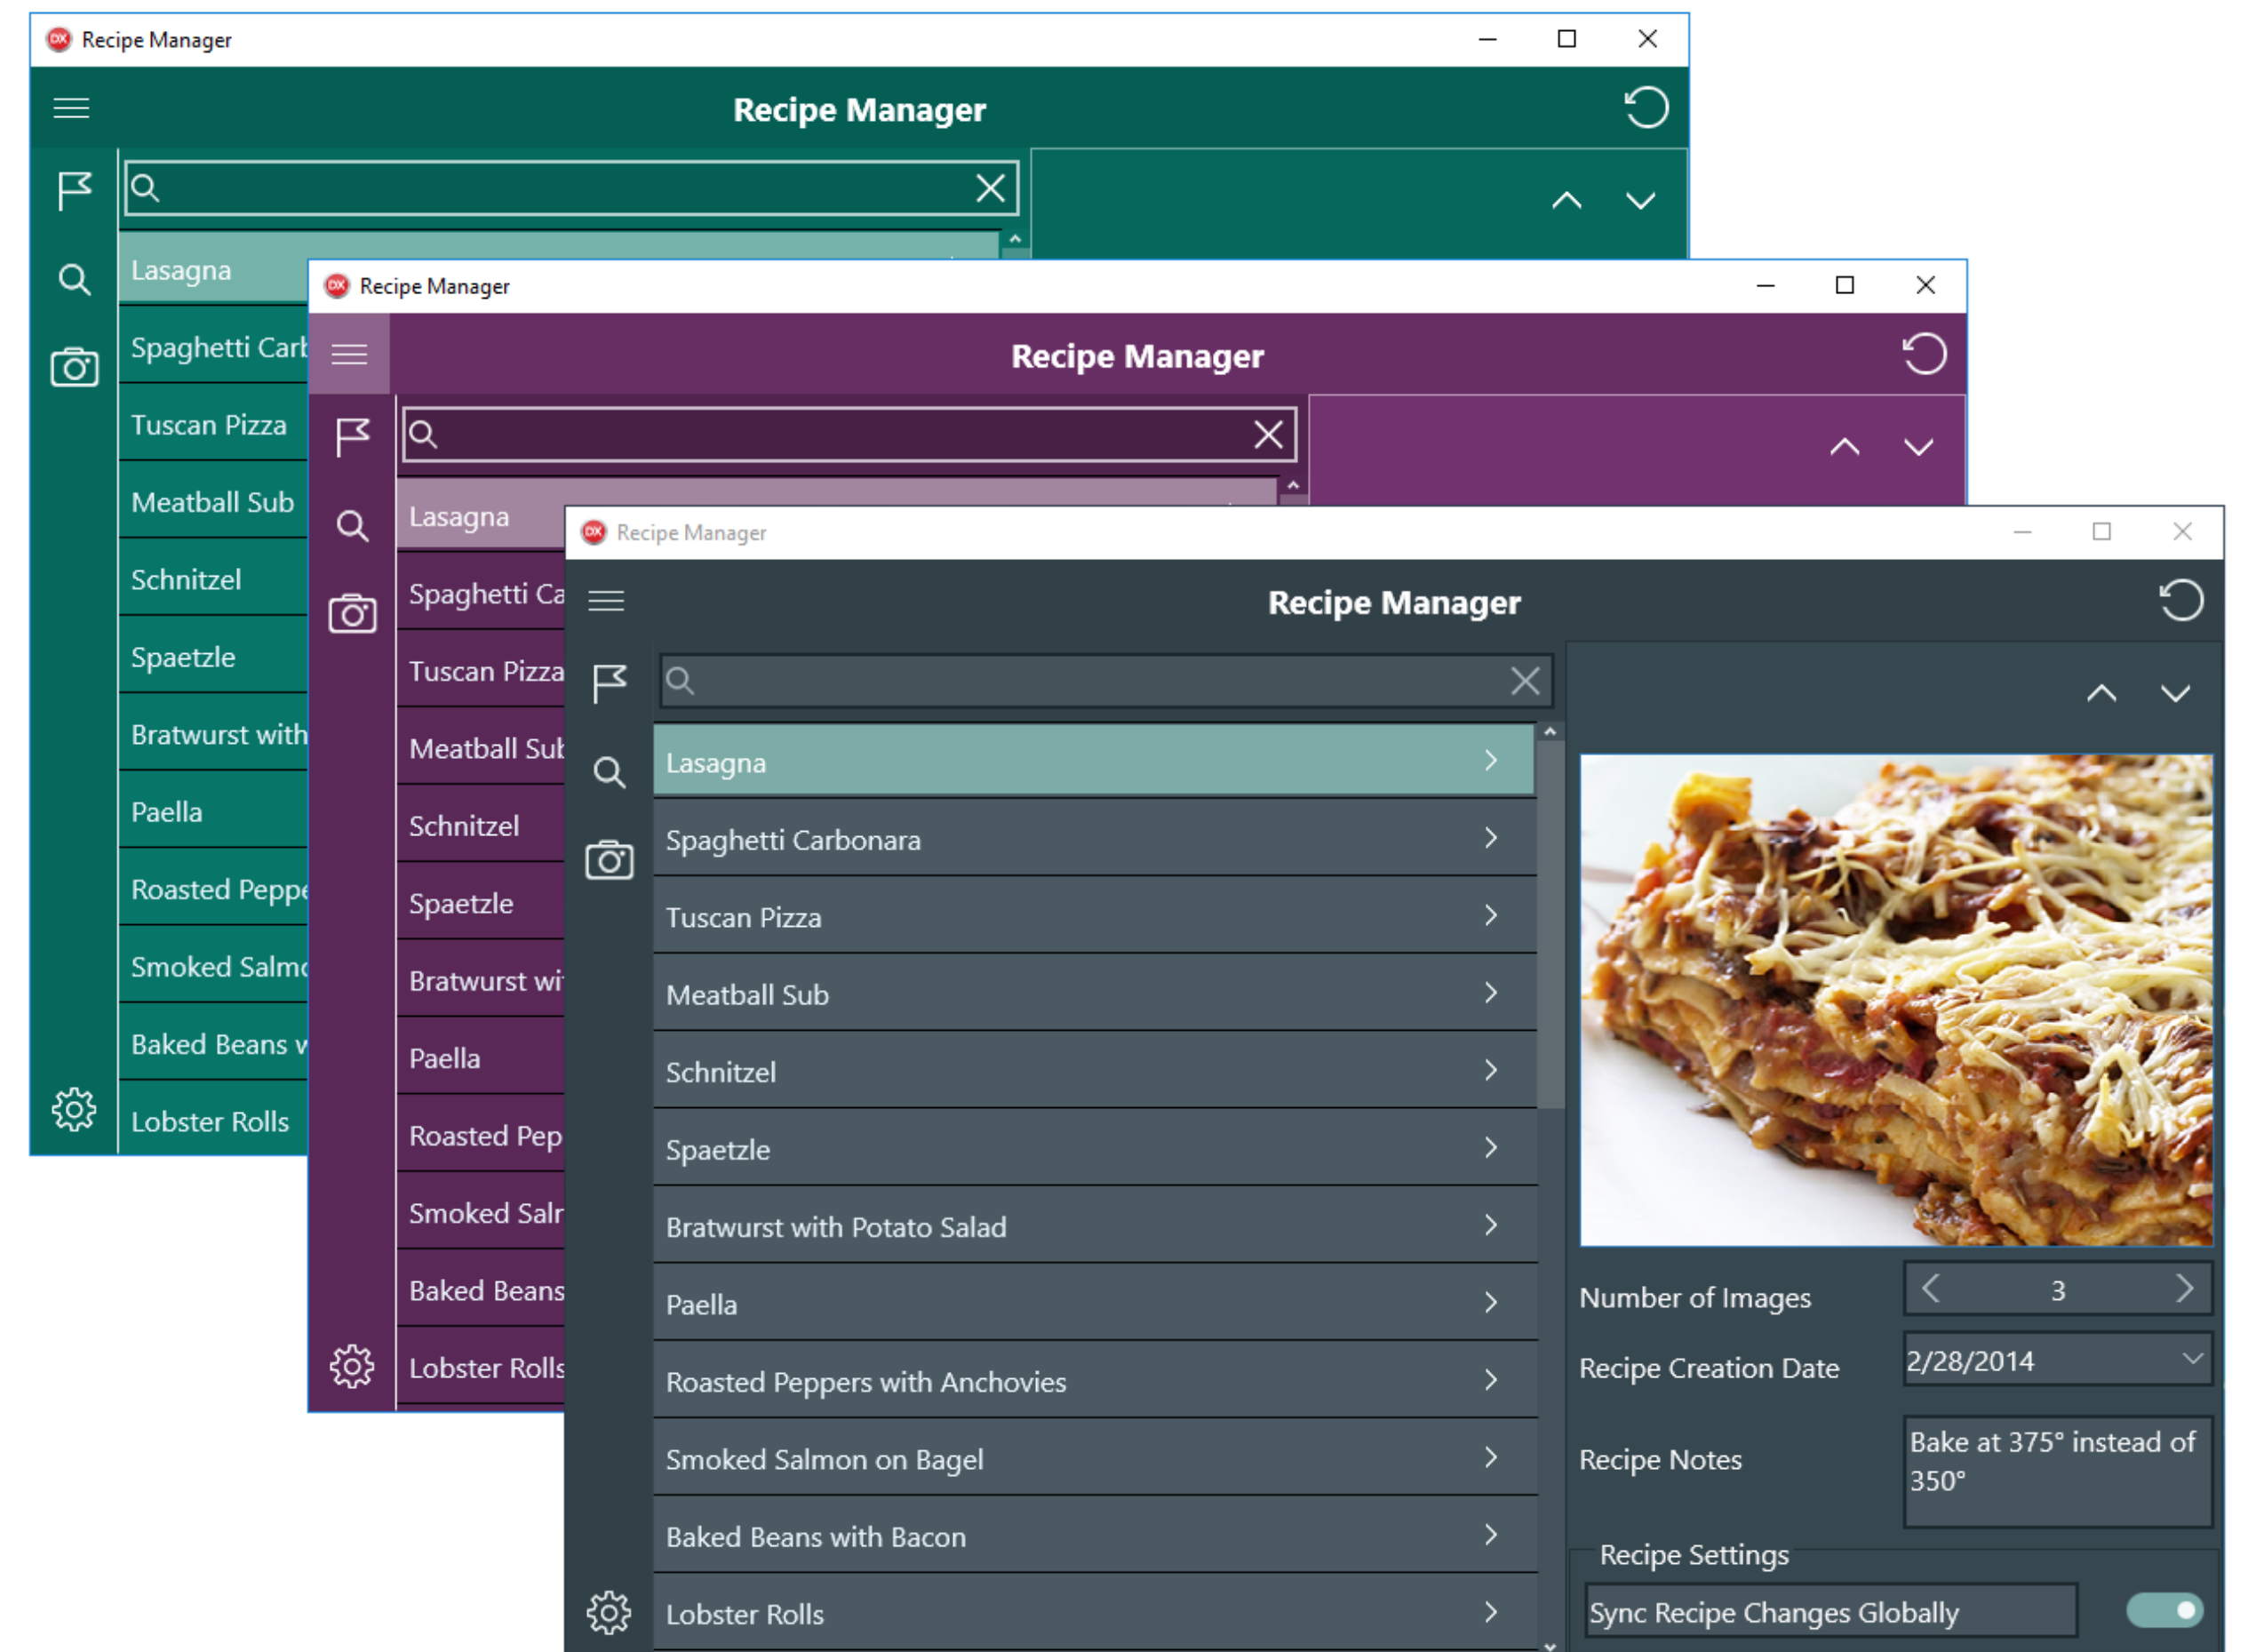

Windows 10 **Blue**

Windows 10 **Dark**

Windows 10 **Green**

Windows 10 **Purple**

Windows 10 **Slate Gray**

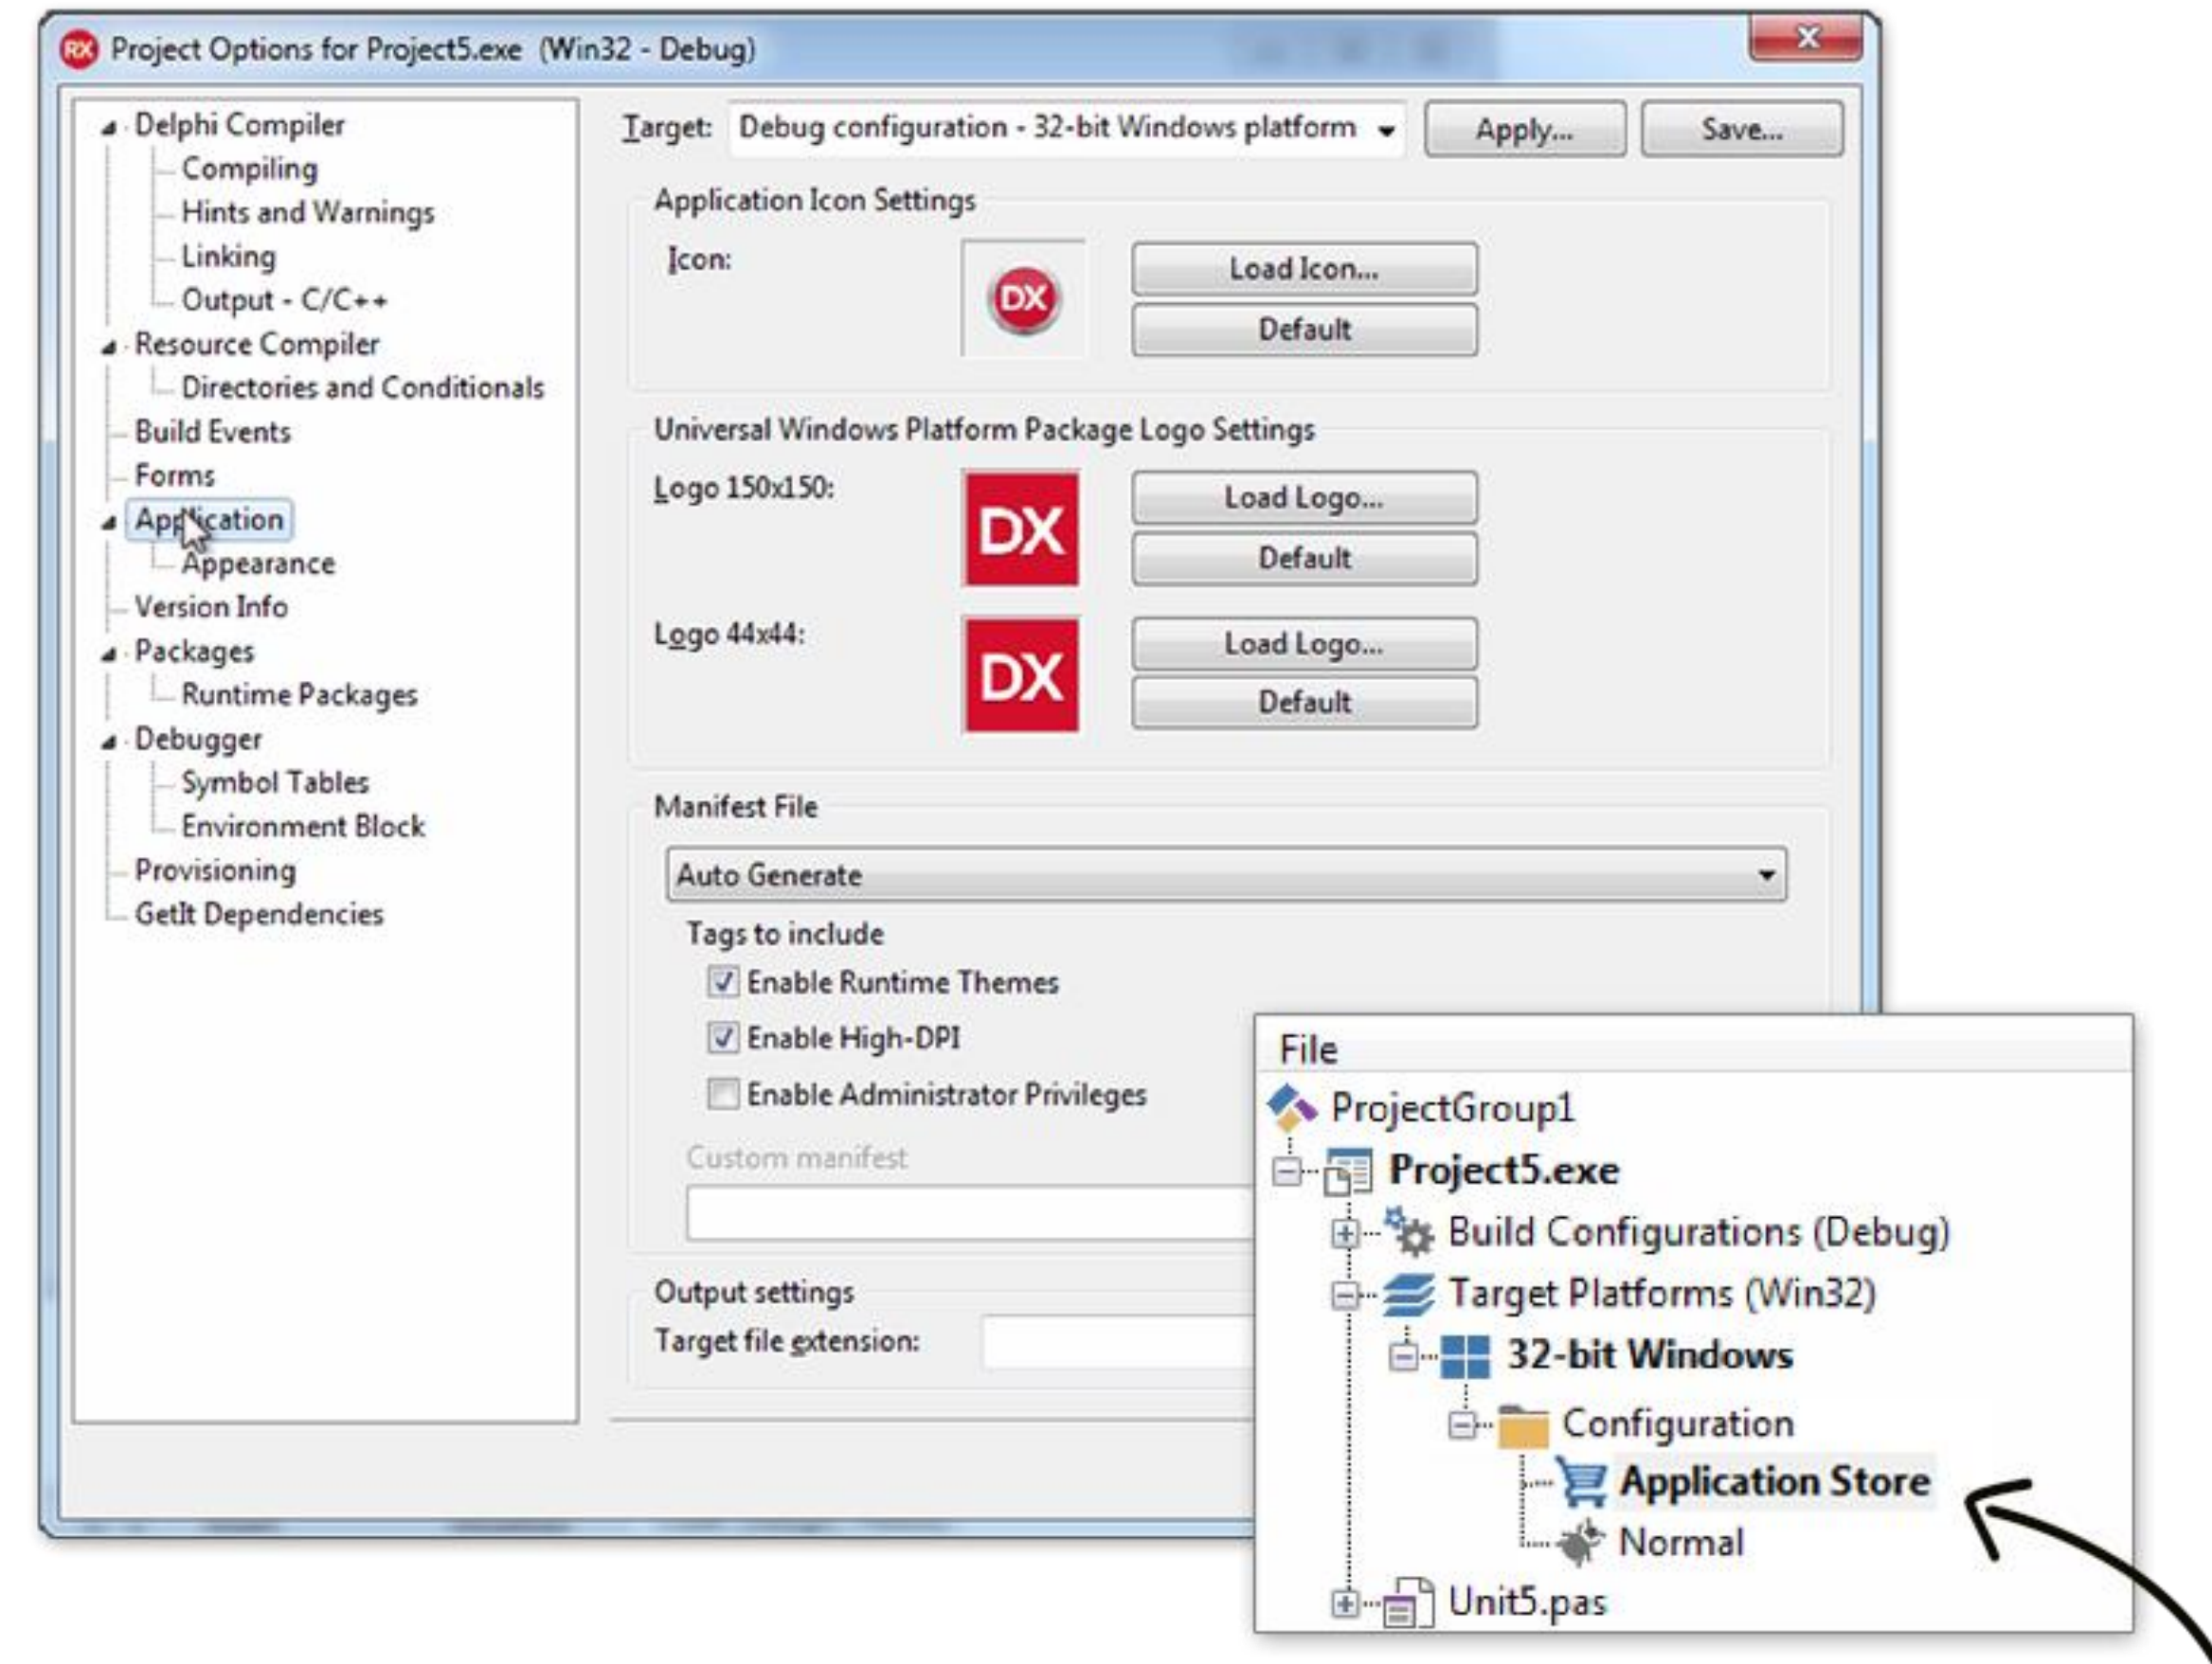

Windows 10 Store support

Package apps as UWP apps

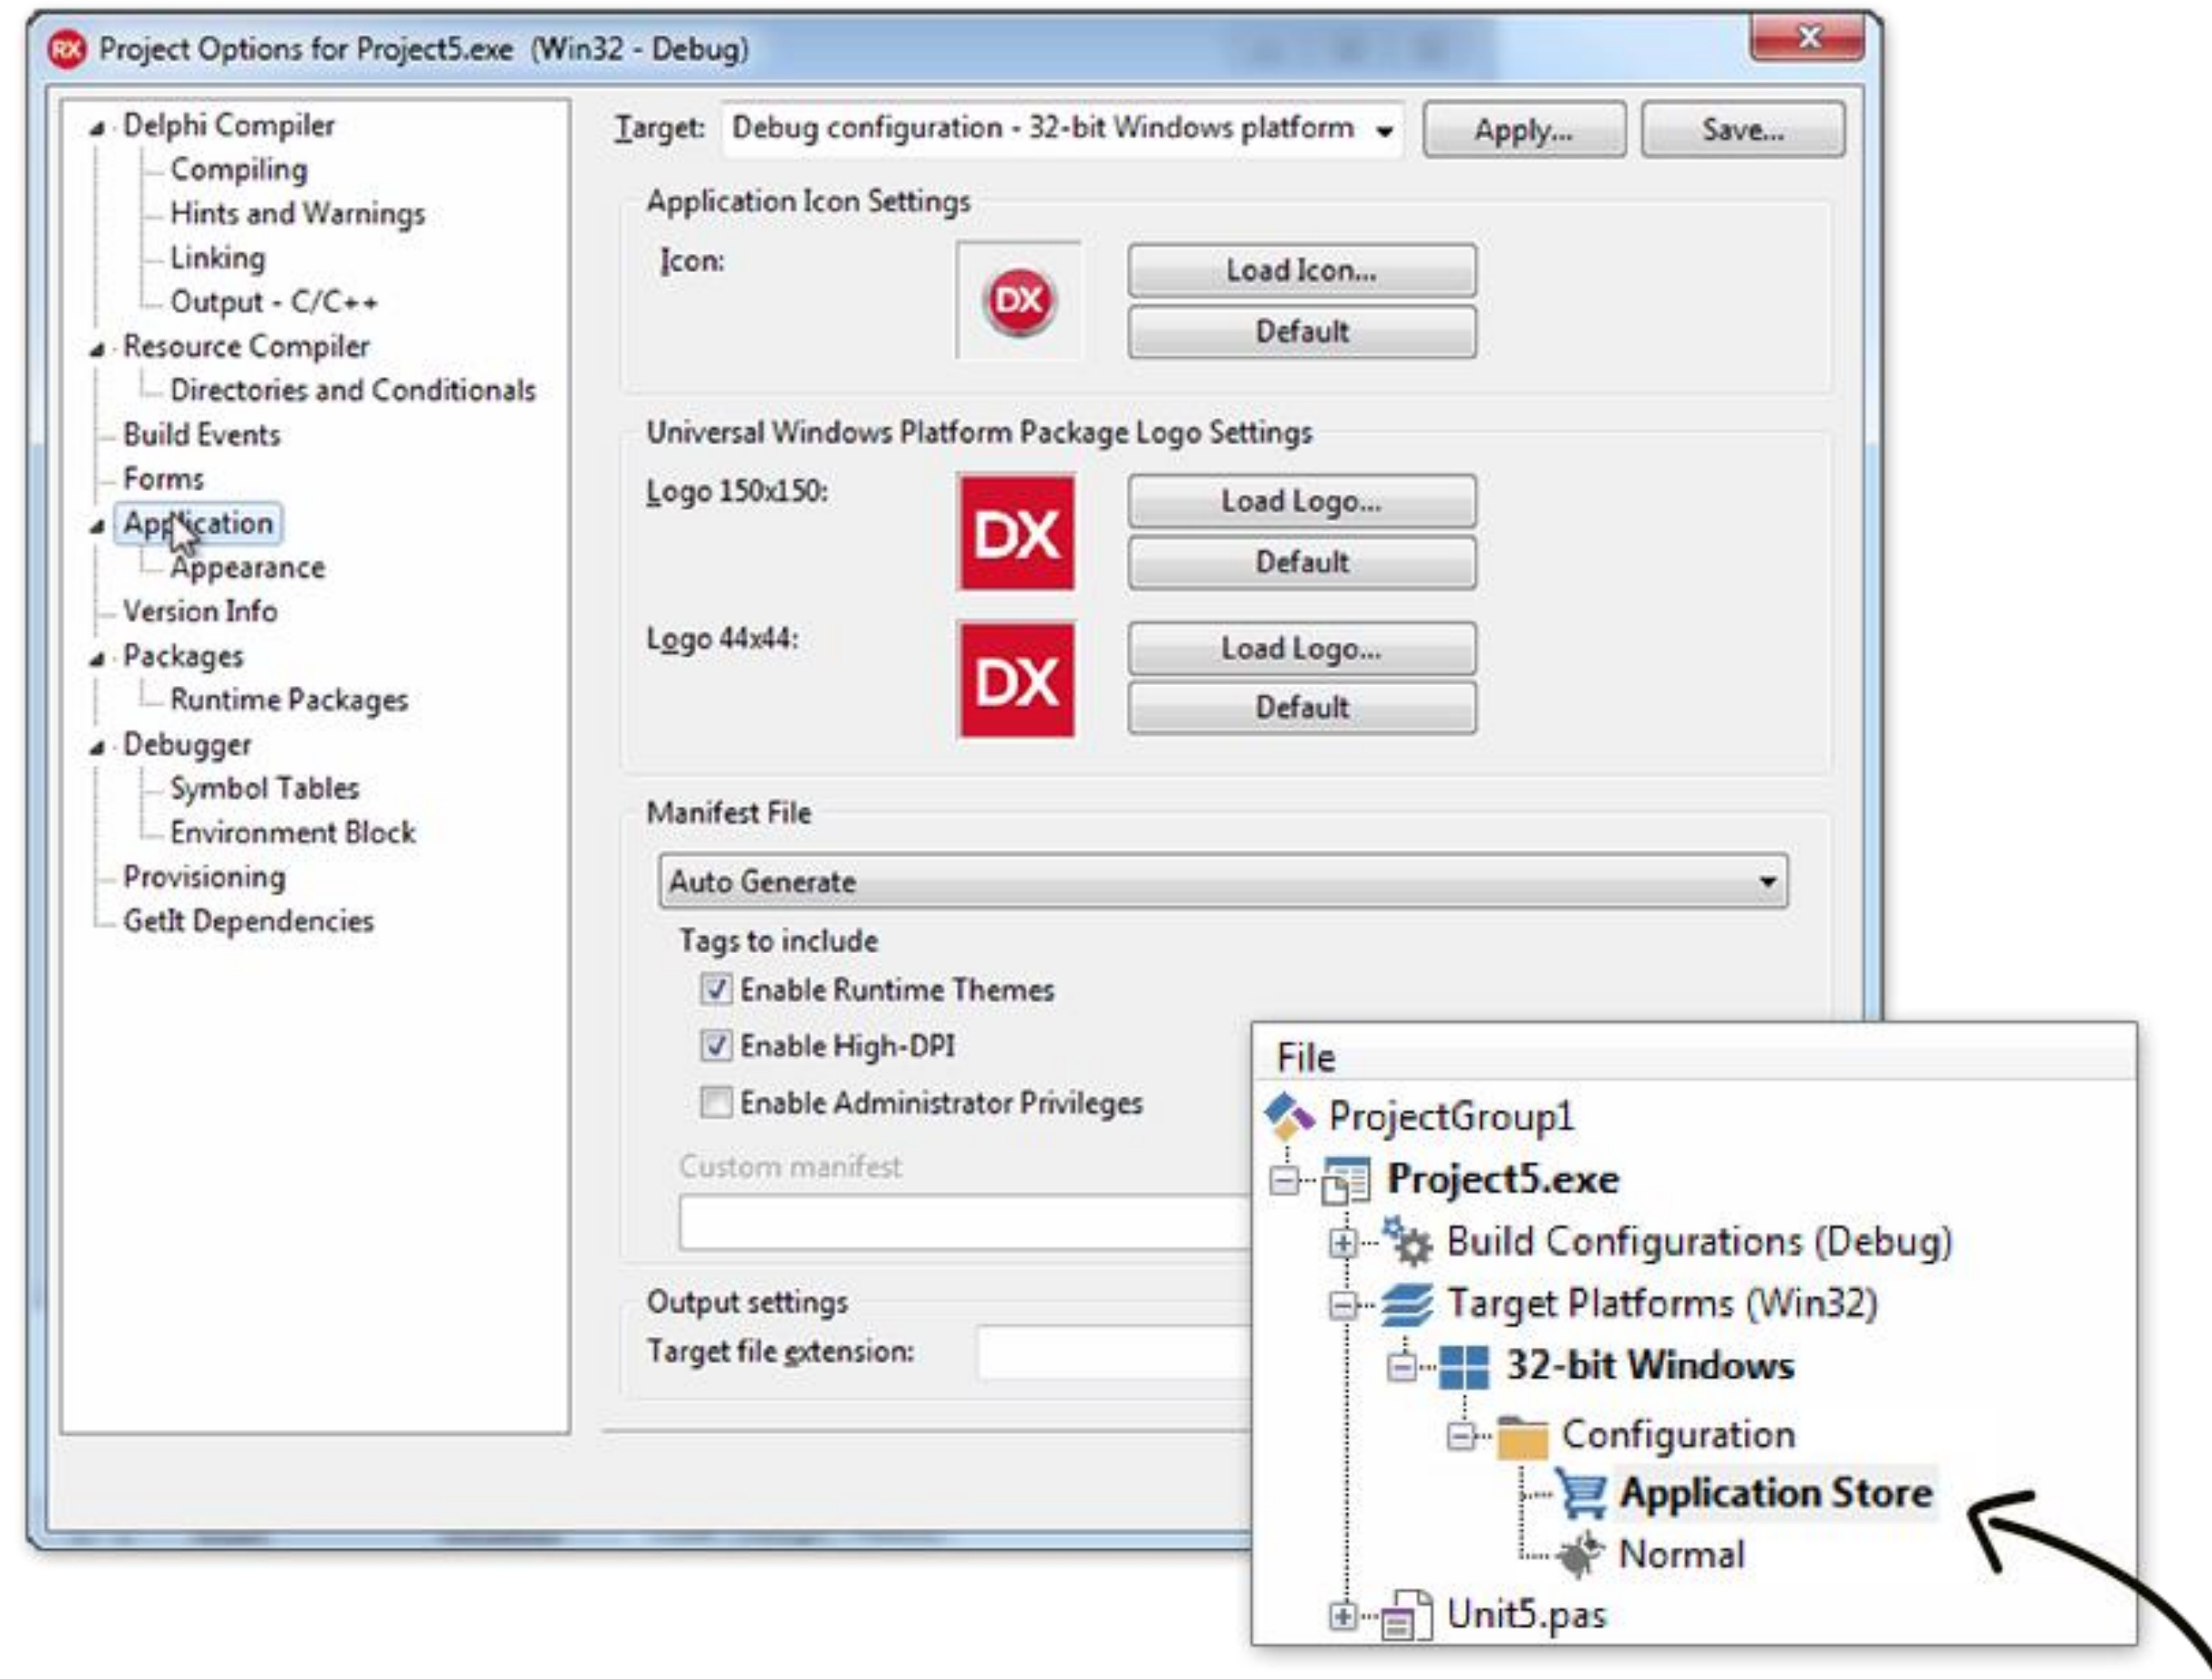

- Desktop Bridge (aka Centennial)
- Sell apps in Windows 10 store to millions of customers
- Deploy to company stores

IDE-based Win Store deployment

RAD Studio was the first IDE to support Desktop Bridge

Windows 10 Store Support

Linux Development with Delphi

Linux Support

- Focus on Linux 64-bit Servers
- Officially supporting
 - Ubuntu 16.x LTS
 - Red Hat Enterprise 7
 - Expected to work on most distributions
- Server side technologies only
 - RTL, DB RTL, IOUtils and file system access, FireDAC, HTTP, REST, Cloud, WebBroker, Apache integration, DataSnap, EMS/RAD Server, JSON, XML, SOAP, Indy, IoT, and more

Delphi Linux Compiler

- Targets 64-bit Intel Linux
- Based on LLVM technology
 - ARC-enabled
 - ZBS off by default
- Need Linux box to import SDK (via PAServer)
 - Not for compiling
- Use PAServer for deployment and remote debugging
 - You can deploy directly, might have to adjust file permissions

Linux RTL Features

- All core RTL is/will be available
 - System, Exceptions, Kernel, POSIX headers, File System, IOUtils, RTTI, Unicode, Threading and Parallel Library...
 - Native HTTP client library (libCurl)
 - XML DOM and JSON processing
 - DUnitX

Linux Database Access Features

- FireDAC drivers for all Linux-capable DBMS
- MySQL (and MariaDB), InterBase, FireBird, Oracle, MS SQL Server
- Sybase ASA, DB2, MongoDB, PostgreSQL, SQLite, Teradata
- Only exception is Informix
- Drivers not available: MS Access, DataSnap, DBX

Linux Internet Client and Server Support

- Indy Clients and Servers
- WebBroker + DataSnap + RAD Server modules (EMS)
 - Apache integration
 - Standalone servers
- Client libraries
 - HTTP and REST client libraries
 - Cloud and BaaS clients
 - SOAP clients

Configure Linux on Machine or VM

- Ubuntu or RedHat recommended
 - Ubuntu Server 16.04 LTS is free
 - <https://www.ubuntu.com/download/server>

Configuring Ubuntu:

- `sudo apt-get install joe wget p7zip-full curl openssh-server`
- `sudo apt-get install build-essential zlib1g-dev libcurl4-gnutls-dev`
- Copy PAServer and extract from tar.gz in any folder

Making Database Apps with FireDAC and the new CData Enterprise Connectors

FireDAC

FireDAC

- High-performance, easy-to-use, enterprise database connectivity
- Universal data access, but with many database specific features
- No drivers required and full source code provided
- Compatibility with the BDE means easy migration of legacy applications with “reFind” utility

FireDAC Selected Features

FireDAC

Metadata

Batch Move components

Local SQL

Live Data Window

Options System

Monitoring

Cached Updates

Array DML

Data Type Mapping

Recovering Connections

Autoinc Fields

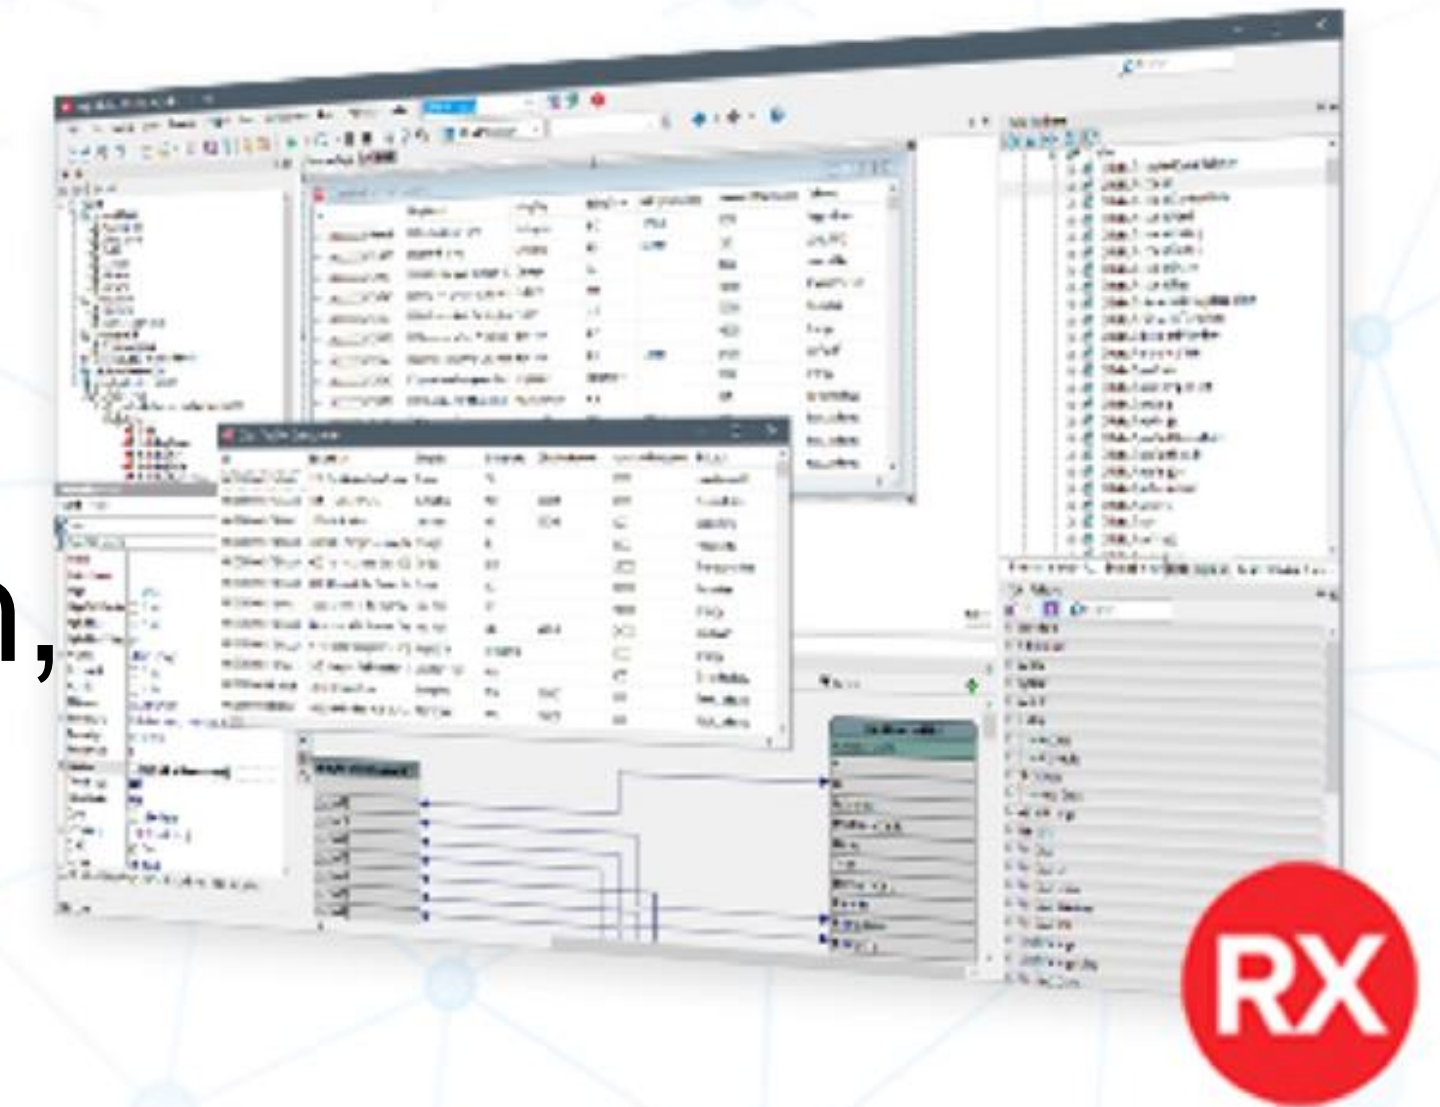

... and more

FireDAC Changes

- New - MariaDB support (v5.5 and later)
- MySQL support for v5.7
- Firebird support for Direct I/O
- TFDMemTable design time dataset editor to create data for runtime use
- TFDDataMove component removed. Use TFDBatchMove instead

Enterprise Connectors

- Connect Delphi & C++ Builder Apps to data from popular applications for Accounting, CRM, Marketing Automation, ERP, Collaboration, NoSQL, Big Data, and more.
- SQL-92 Compliant data access:
“Select * from Customers ...”
- Works as part of FireDAC, technically FireDAC drivers

Enterprise Connectors

Developed in partnership with CData

2 different offerings: Enterprise and Enterprise Plus

Enterprise: ~ 45 connectors

Enterprise Plus: ~ 80 connectors

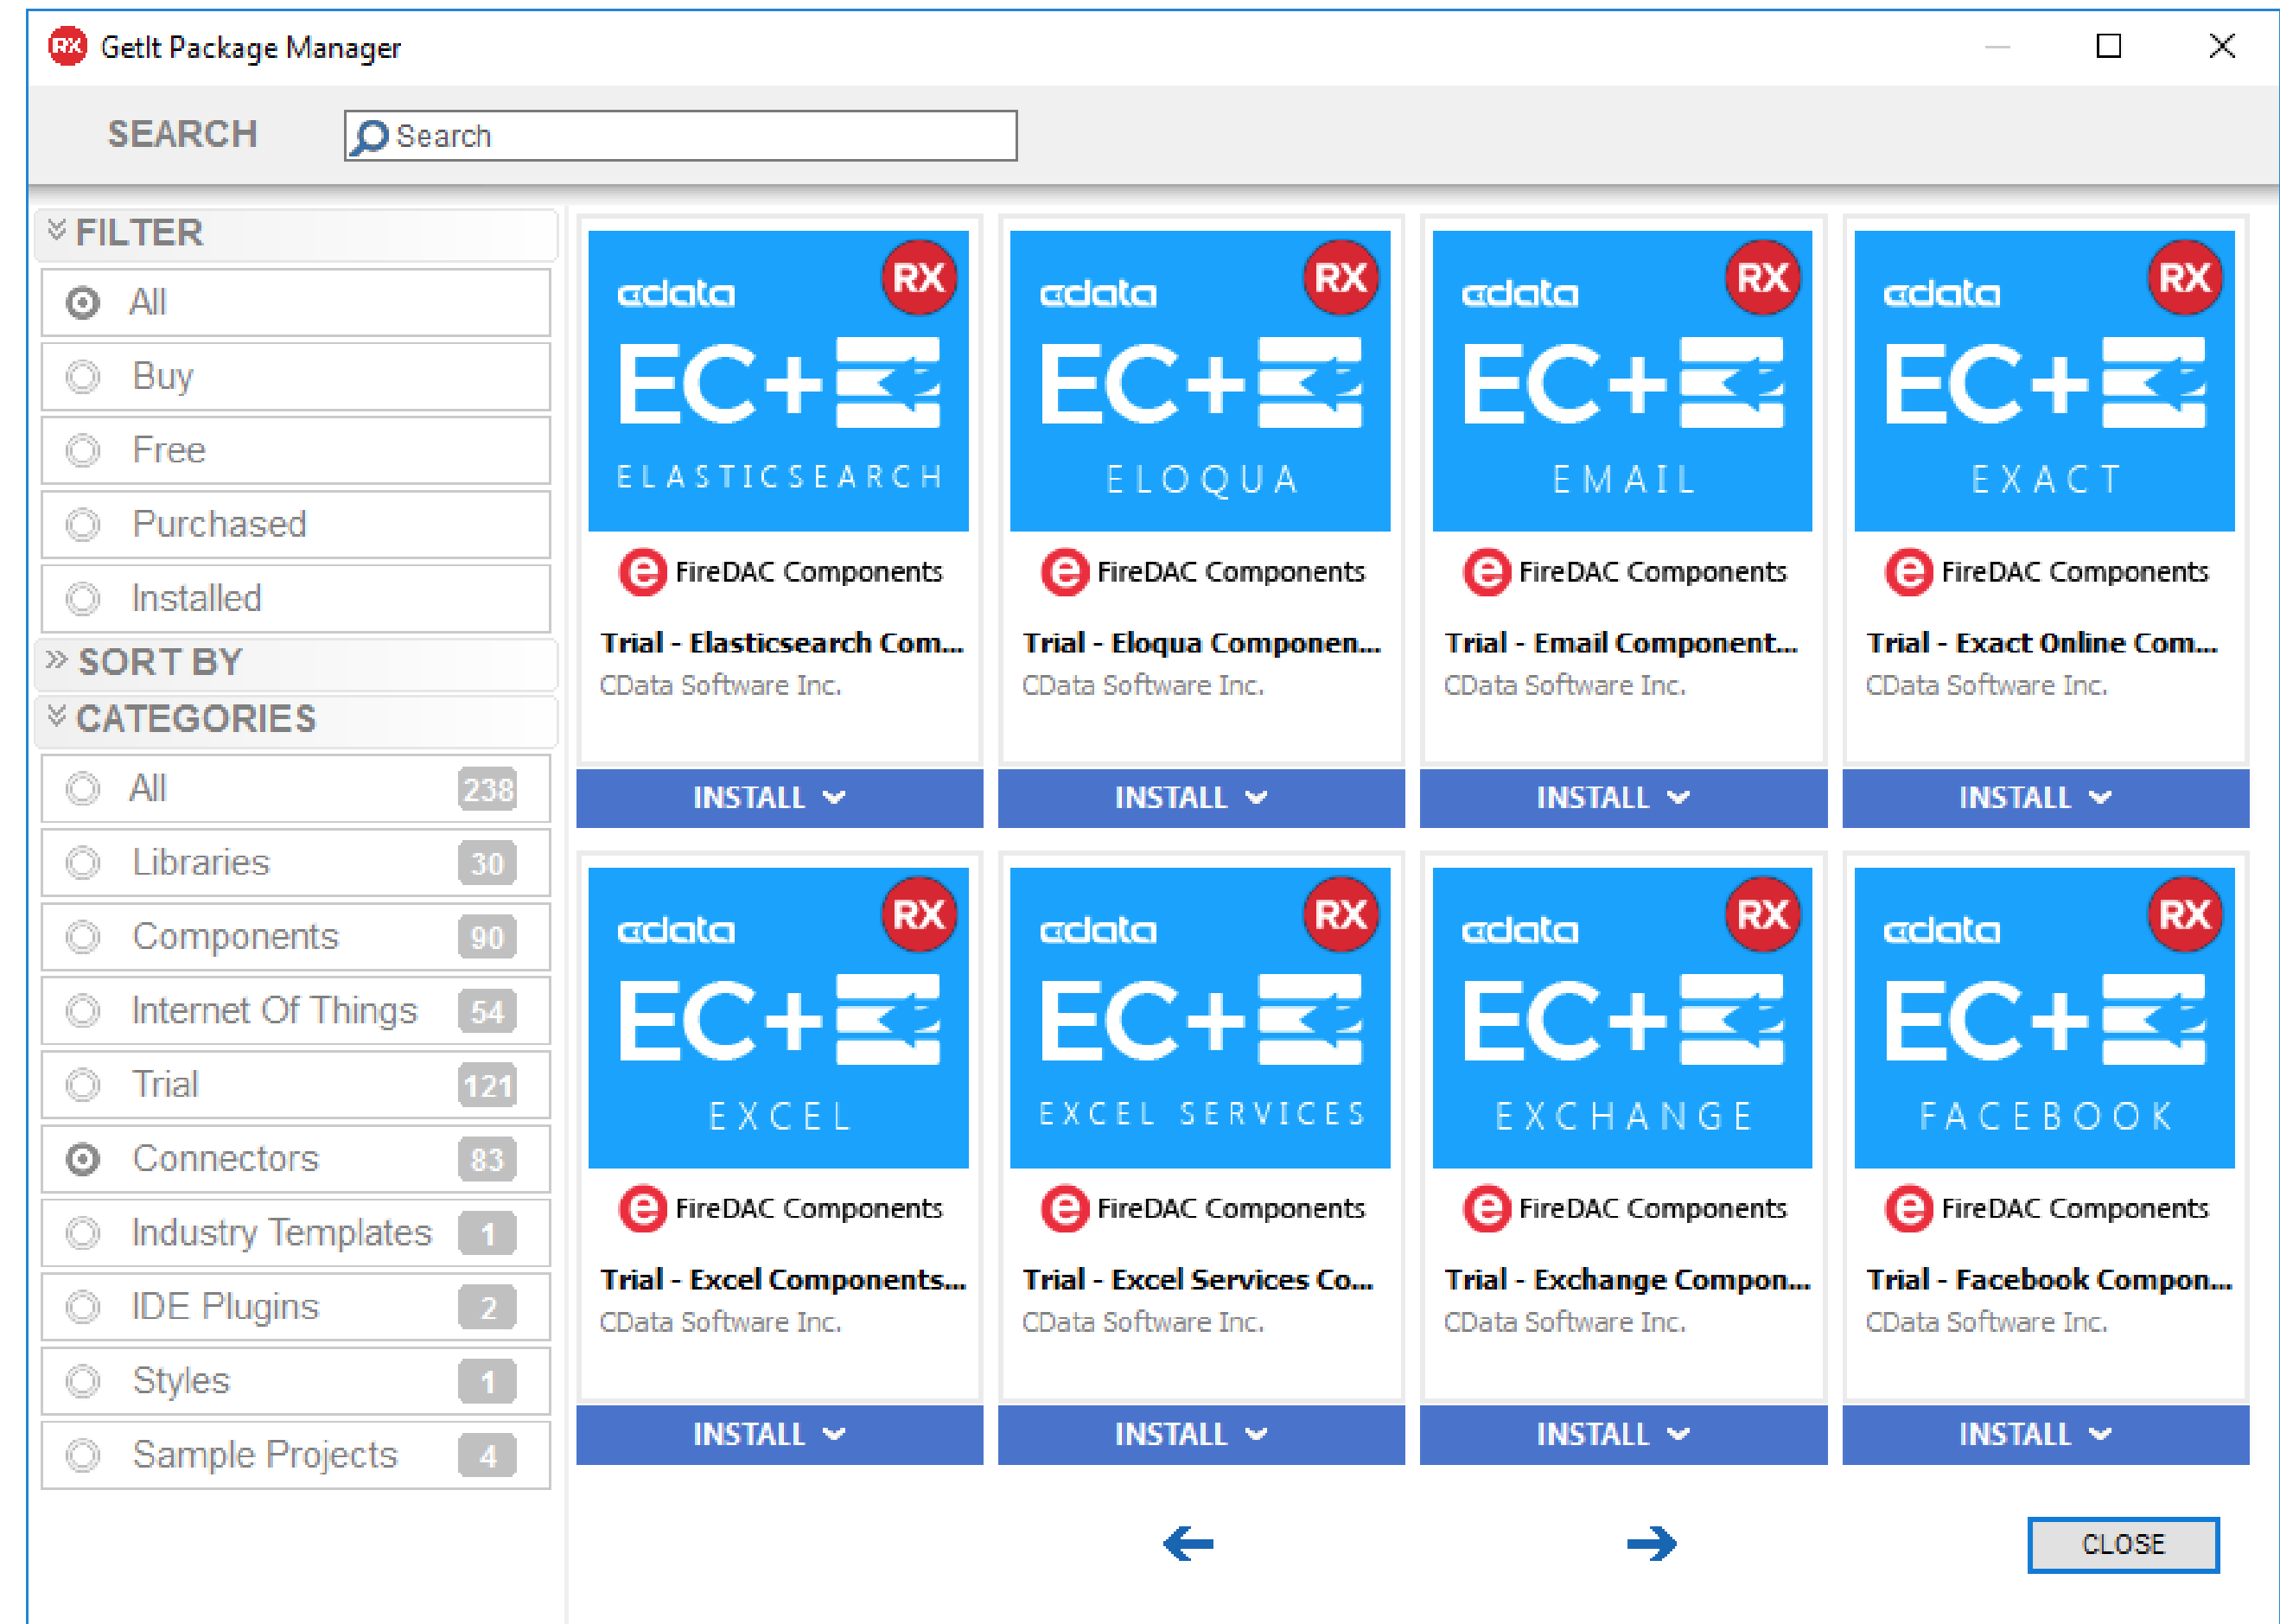

Annual Developer Subscriptions: Ongoing updates, upgrades, new releases while subscription remains current.

Enterprise Connectors Trial

30 DAY trials of each
connector available in GetIt

New “Connectors” category

Building Scalable REST API Solutions with RAD Server

RAD Server

The Perfect Backend for Delphi and C++Builder Apps!

Implement RAD Server services in Delphi or C++Builder

- Easy REST API End-Point Publishing
- Server Metadata Publishing based on Swagger.io
- Mobile Push Notifications
- User/Group Management
- API Usage Analytics
- User Location/Proximity and BeaconFence
- IoT Edge Modules and ThingPoints

RAD Server Architecture

System Database

Pluggable EMS
packages (*.bpl)

EMS Server

- Version
- API
- Users
- Groups
- Installations
- Push
- Edgemodules

- Resource A1
- Resource A2

- Resource B1

- ...

HTTP Clients

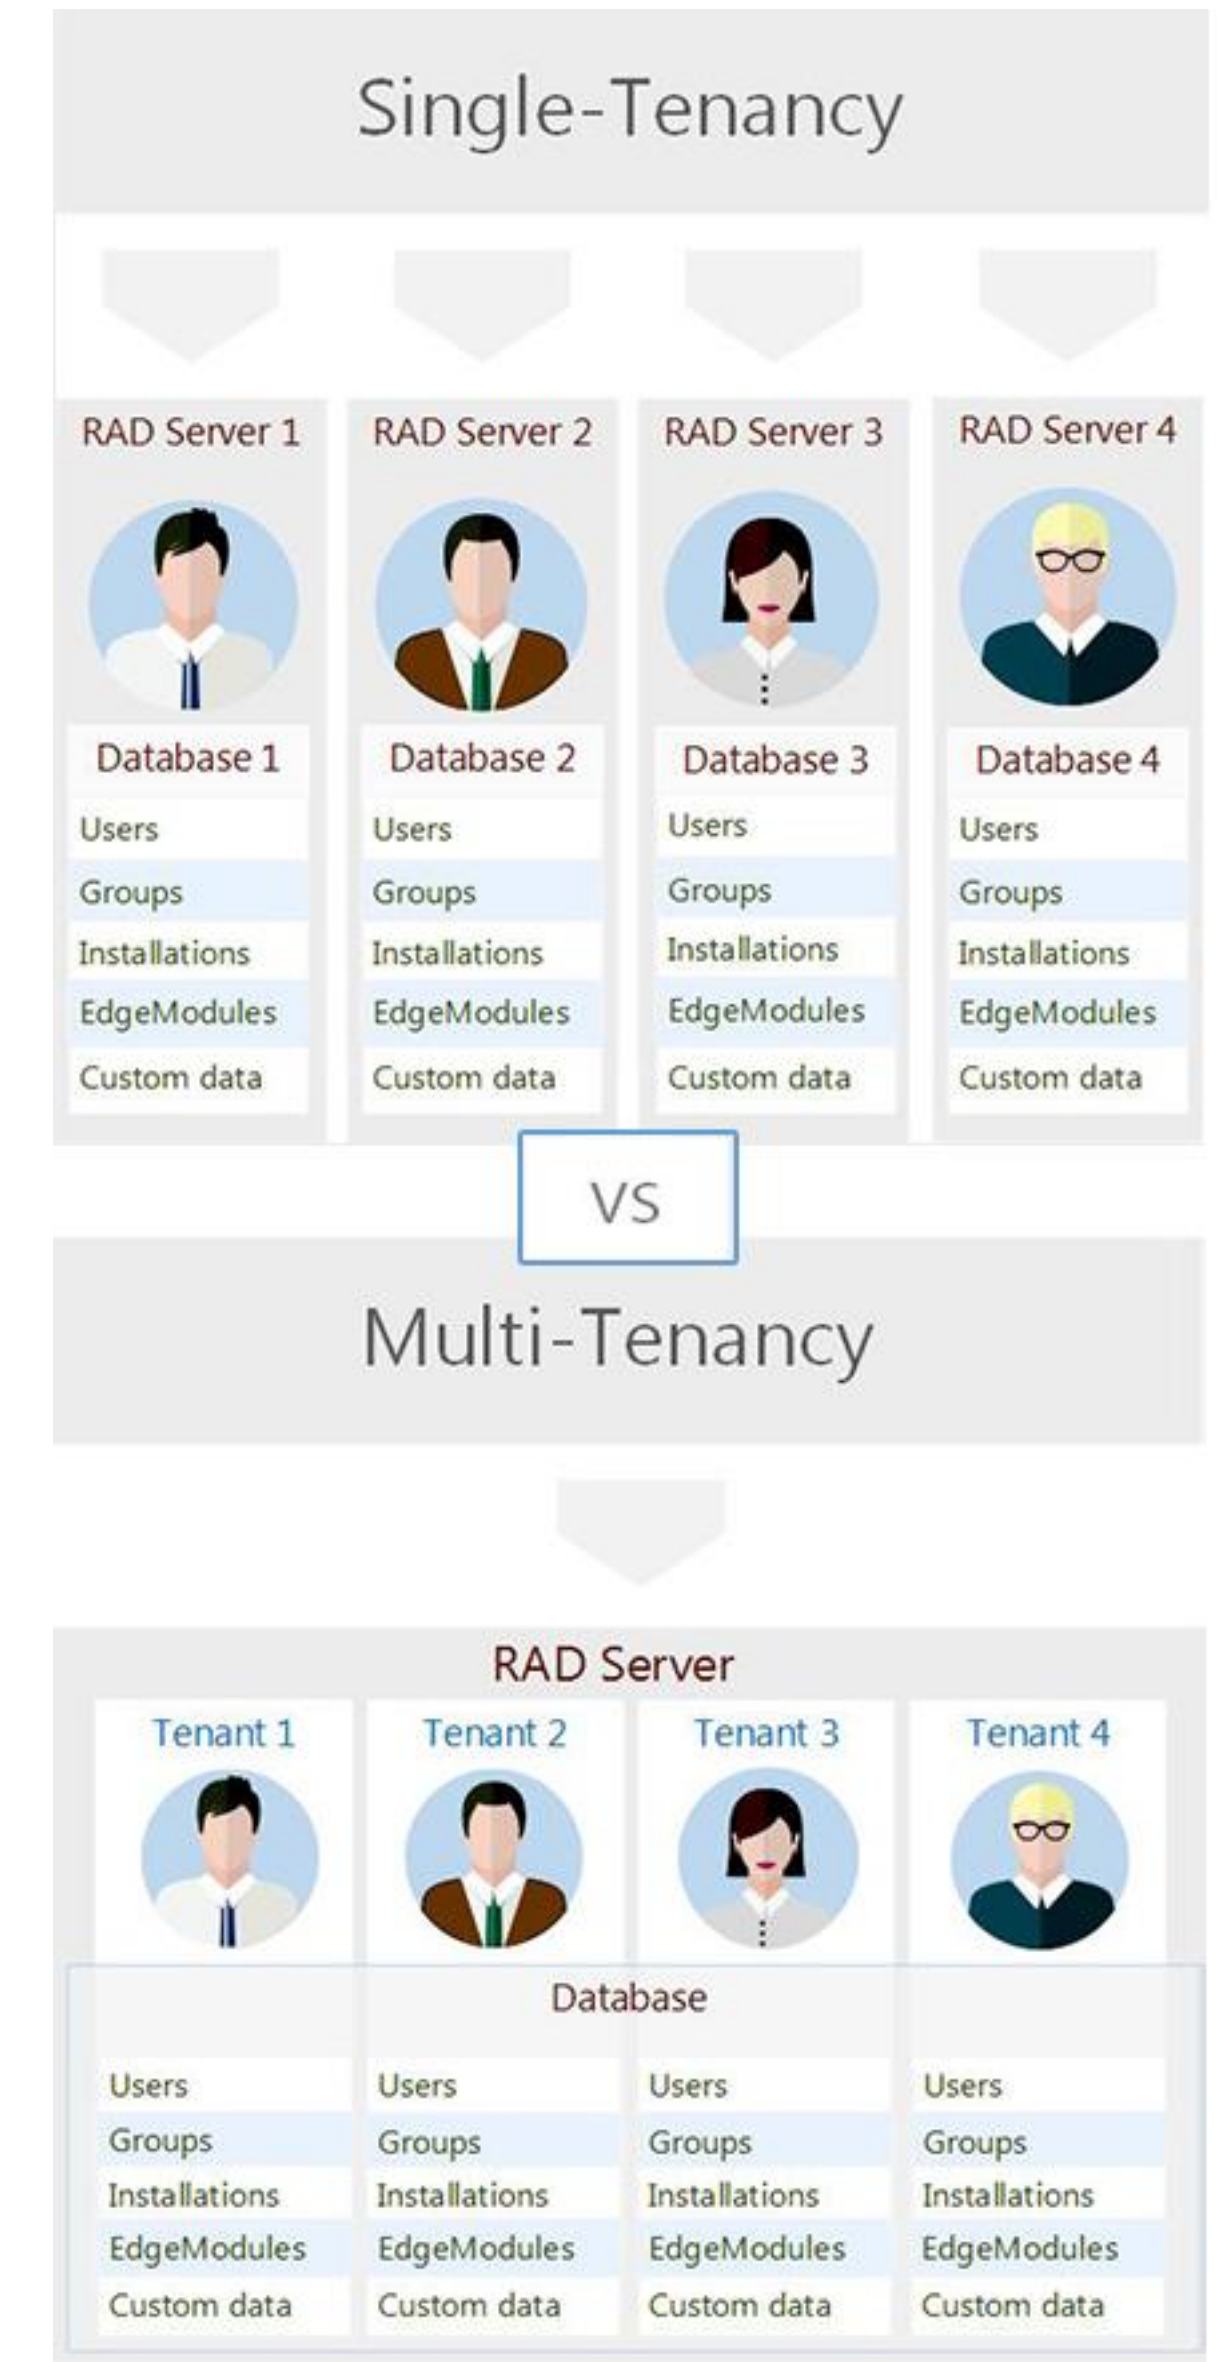

Natively compiled FMX
clients or HTML +
JavaScript clients

RAD Server Enhancements

Multi-Tenancy Support

- A single RAD Server instance with a single RAD Server database connection can now support multiple isolated tenants
- Each tenant has a unique set of RAD Server resources including Users, Groups, Installations, Edge Modules, and other data
- Tenant Administration: Create new tenants, edit existing ones, add, edit or delete tenants

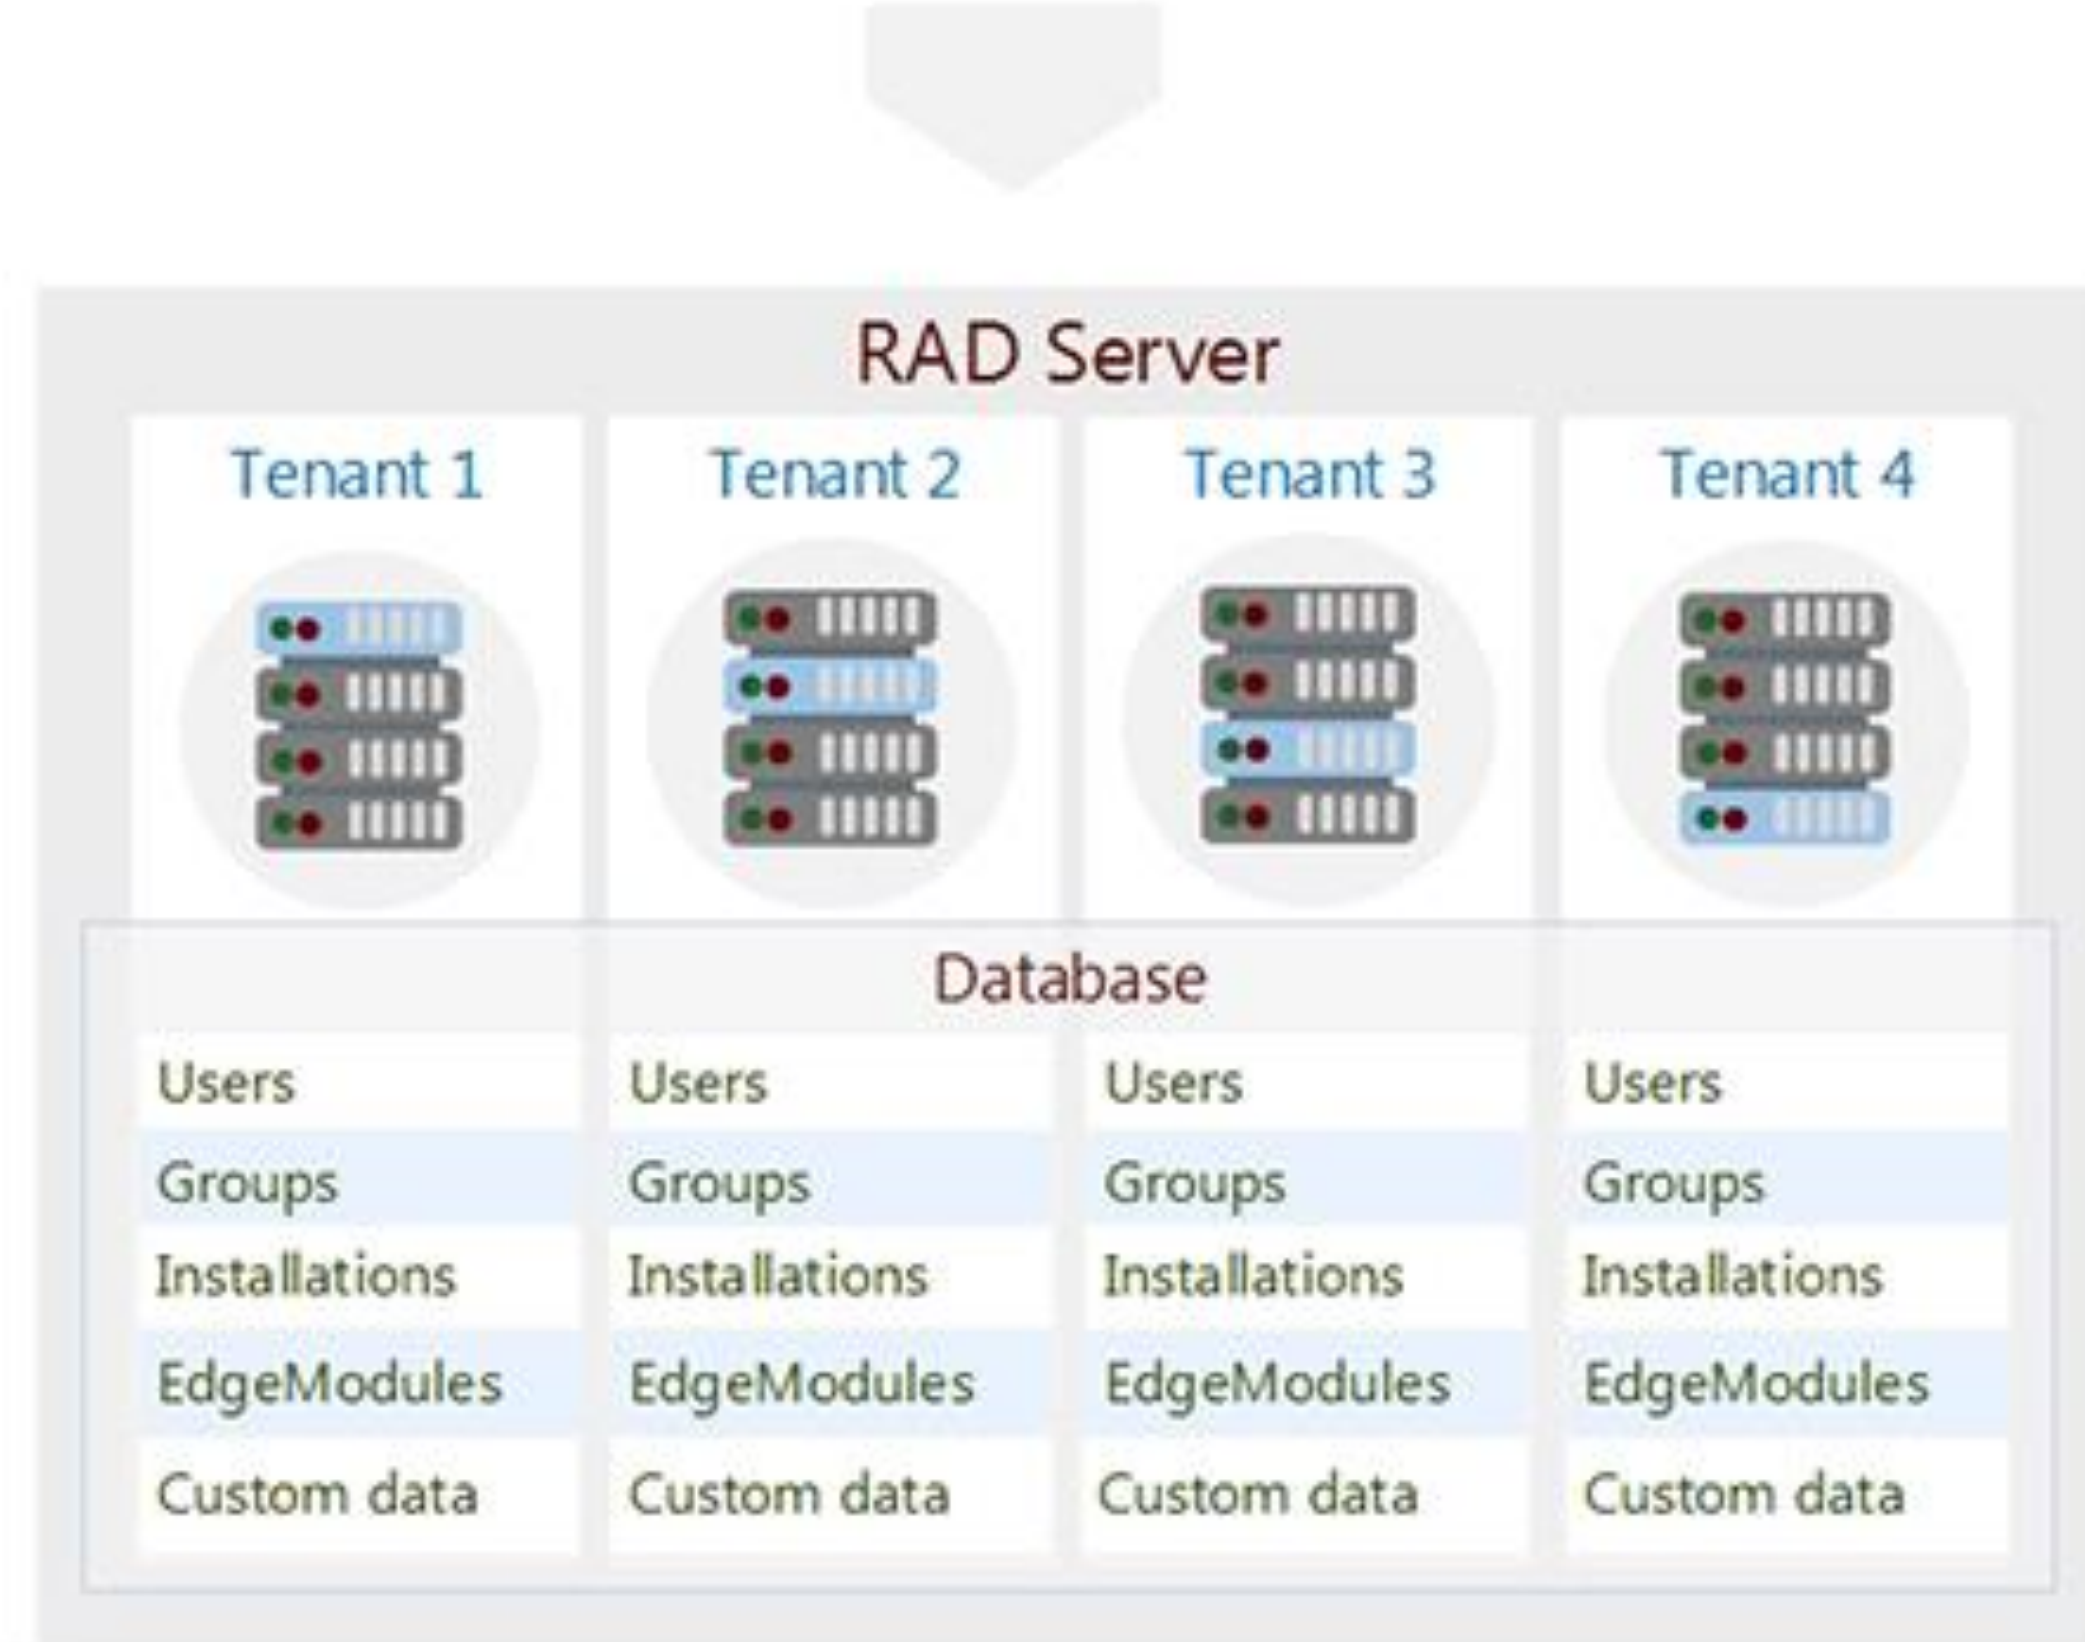

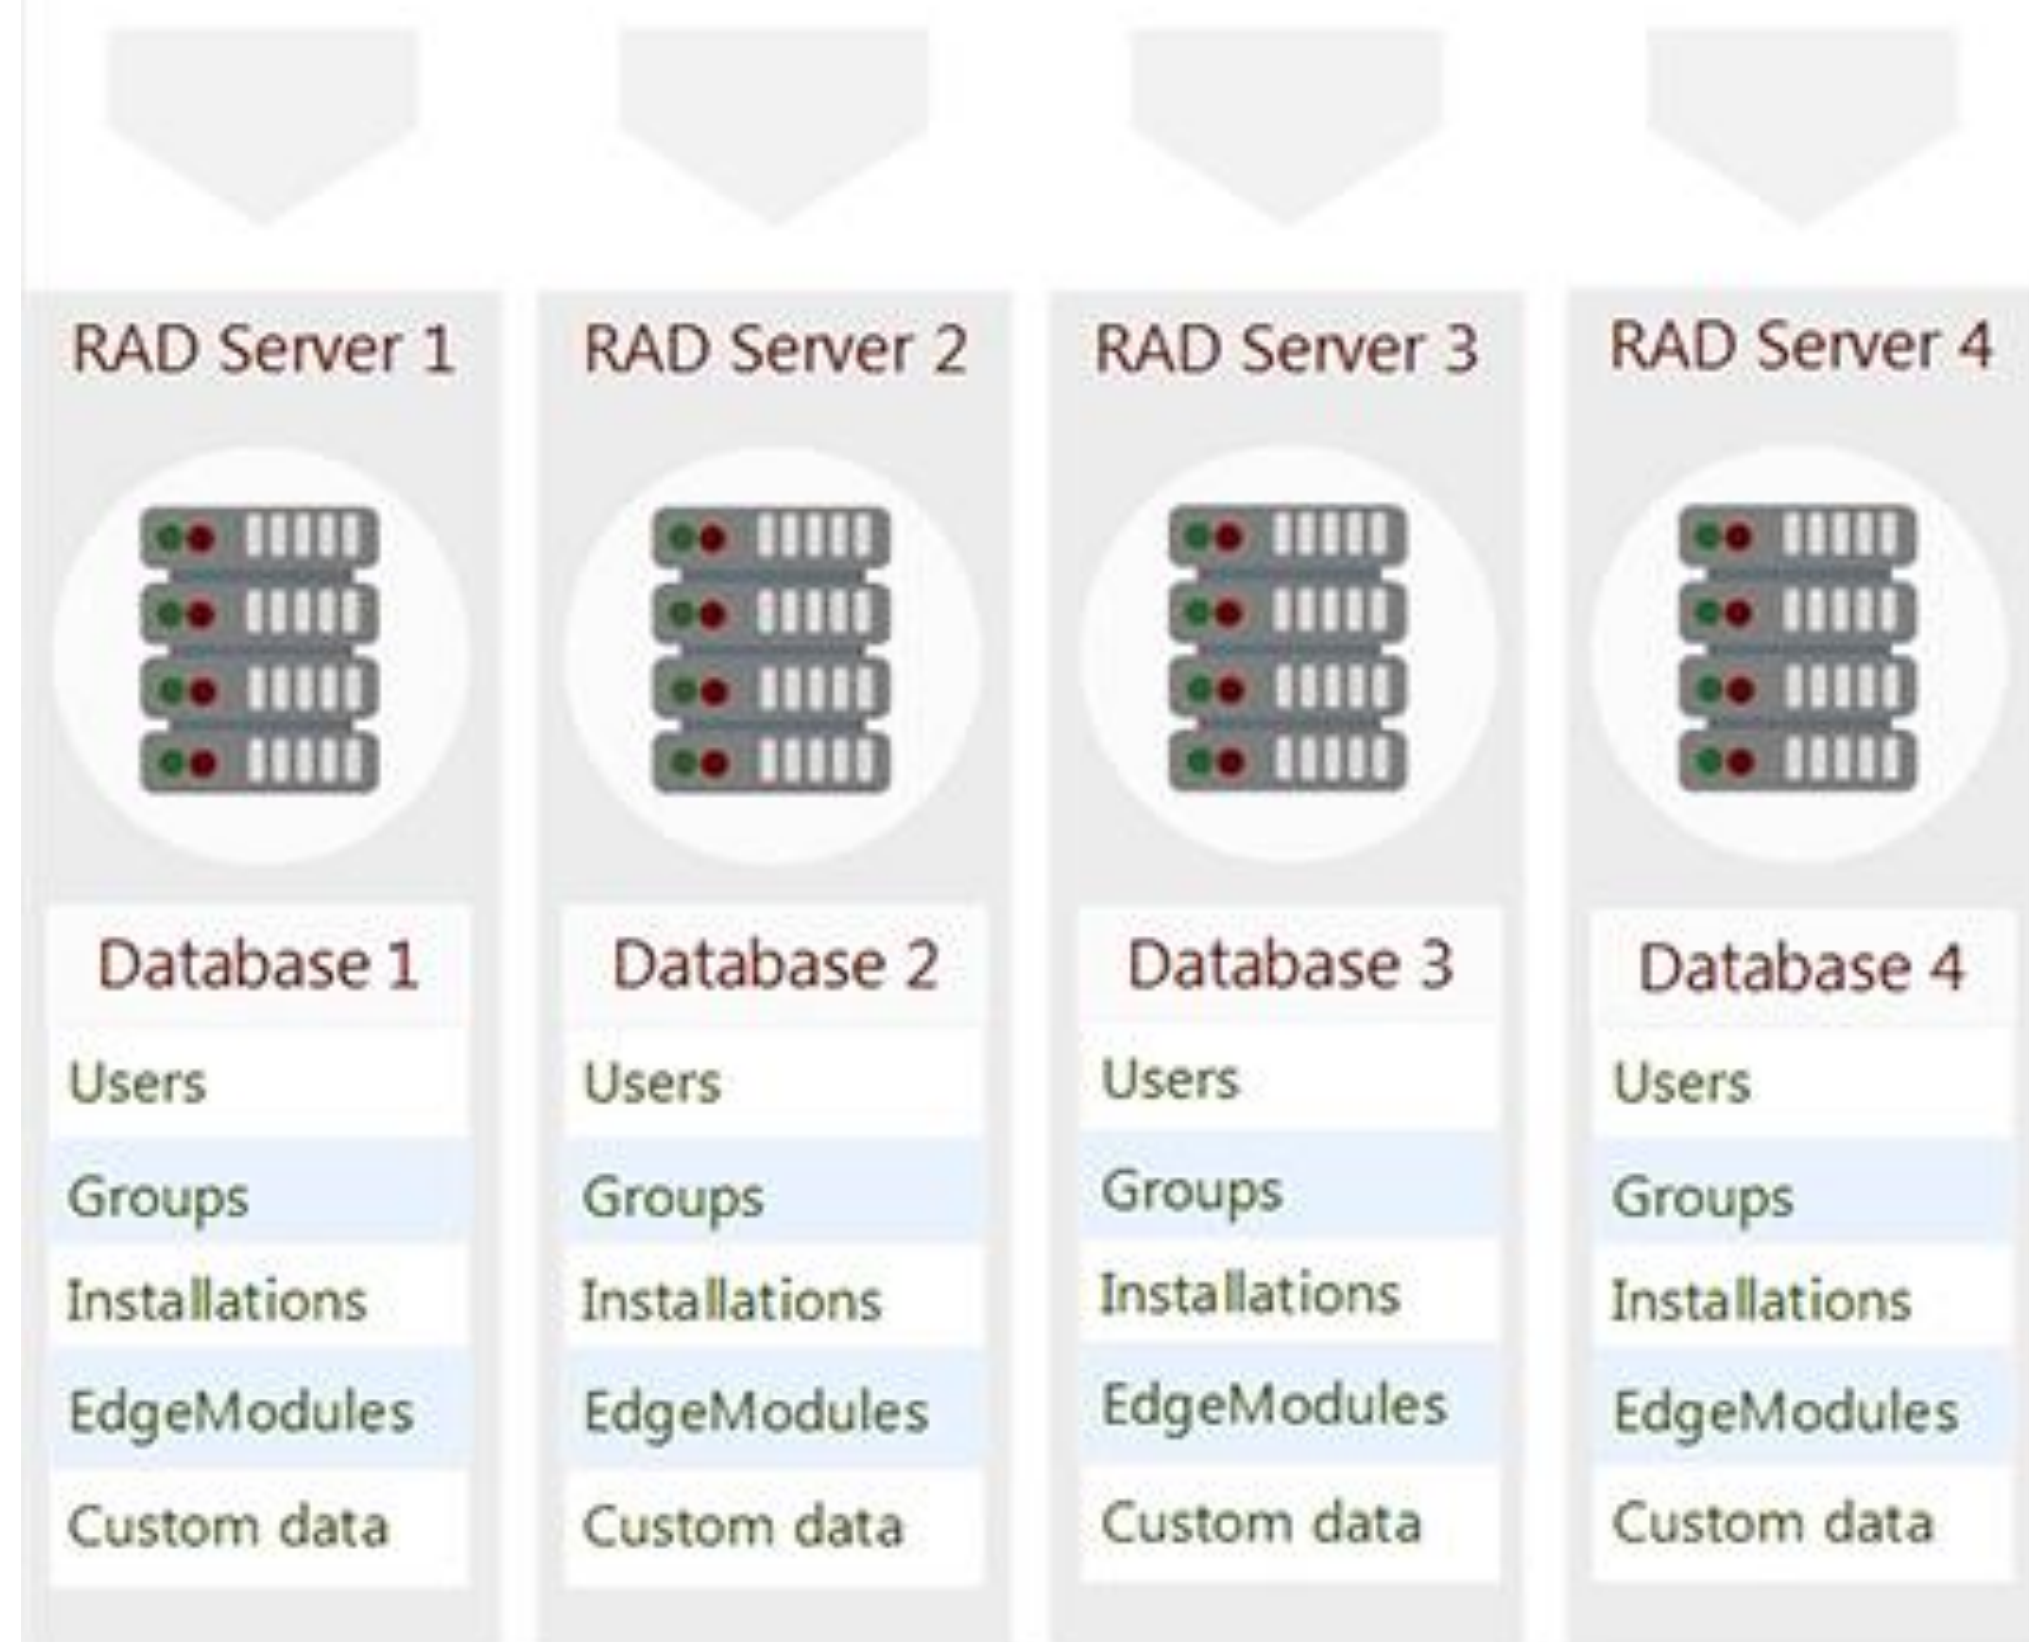

RAD Server

Single-Tenancy

vs

Multi-Tenancy

Using RAD Server with ExtJS Clients

Combine Embarcadero Tools:

- Use RAD Server for building JSON REST web services
- Use Sencha ExtJS solution for building a web app calling the web services

Recently build demo: *** Survey app

Plans and Summary

RAD Studio CY 2017 / CY 2018 Timeline**

RAD Studio
10.2.1 Tokyo

RAD Studio
10.2.2 Tokyo

RAD Studio
“Carnival” 10.3

2017

2018

Tokyo Release 1

- Delphi Linux server performance enhancements
- Windows 10 Creators Update support
- Support for latest versions of iOS and Xcode
- Improved Android N support
- C++ Improvements
- Expanded database support

User Experience

- Dark IDE theme
- IDE UI/UX improvements
- Simplified download and install experience

Windows App Modernization

- New VCL Windows GUI Controls
- Windows 10/WinRT/VCL updates
- Enhanced Windows Theming & HiDPI support

C++ Productivity

- CMake Support
- C++ Rename Refactoring

Platform Enhancements

- Android Z-Order (native windowing) support
- Native Android controls in FireMonkey
- Consolidate debuggers

C++ Builder

- Language standards: Clang support, C++ library integration (cont.), C++ Linux
- Further CMake support (IDE)
- 64-bit macOS platform support (10.3.x), with C++17

Delphi

- Language Enhancements
- 64-bit MacOS platform support

RAD Studio 10.2.1 released in August 2017
